Grand Total for killa ...	633,730	8,00,743			648,154	3,77,127	

\* This is not the true area held khas; we must deduct 429 acres Birnarsinghpur tanki bahal, and khandaiti mahals 9,710 acres—*vide* paragraph 7.

† To this area should be added 5,231 acres Lakhiraj bahal situated within the ambit of khas mahal villages, making a total alienated area of 77,800 acres.

The number of tenants will not agree with the number of tenancies in column 5, as a tenant may hold lands in more than one village.

The incidence of the rents now fixed for raiyati land is Re. 1-10-6 per acre. The incidence on the whole area cultivated at the time of the last settlement was Re. 1-6 per acre, and is now Re. 1-10 per acre. In addition, the raiyats pay

half an anna in the rupee for road cess, an equal amount for forest privileges, and have hitherto paid 10 pies in the rupee (or  $1\frac{1}{2}$  anna per acre) chaukidari tax. It would appear that these payments are light compared with those of their neighbours in the Sadar subdivision, and the Lieutenant-Governor agrees with the Board that the settlement has been a moderate one. It has been paid punctually and without complaint for two years. The natural advantages of the estate, consisting in a comparatively steady annual rainfall and a large area of pasturage, have, combined with a lenient assessment and fair administration, resulted in a large measure of prosperity, which will not fail to be enhanced by the advent of railway communications and the consequent access to fresh markets.

The Lieutenant-Governor has examined with interest the statements regarding under-tenancies. It is unfortunate that no statistics were compiled in the last settlement of their number and the incidence of their rent; it cannot therefore be ascertained to what extent they are increasing in number, and still less does it appear what proportion of those now found to exist originate in the prosperity of the raiyats who pay direct to Government. It is reported that there are 2,518 agricultural under-tenants, paying on an average Rs. 2-3 per acre cash rents, whilst 2,076 pay half produce rents and 2,429 pay mixed produce and cash rents, the incidence for these latter being estimated at Rs. 6-1 per acre. As there are 176,000 tenancies paying rent direct to Government, it would appear that the practice of subletting does not at present widely prevail.

There remains the third class of landless labourers, who are estimated by the Settlement Officer to number 40,000, and are believed to be gradually increasing. Unlike the ploughmen of Bihar, they are not given a small portion of the farm of their employers as part payment for their services, and to this extent their condition is inferior. But the construction of the railway provided novel forms of employment, and the facilities it affords for migration should effectually ameliorate their lot.

6. The new assessment came into force in the *kist* of December 1897, and was sanctioned for 15 years.

7. The cost of the present settlement was about Rs. 1,90,000, of which the survey and *khaapuri* required Rs. 63,277. The incidence per acre on the total area of the *khas mahal* was 5 annas 4 pies. The Lieutenant-Governor agrees with the Board that the survey and settlement operations were both speedy and economical, and that their results have been satisfactory.

8. The final report submitted by Mr. J. H. Taylor is very full, and in addition to the usual operations connected with settlement, deals with almost every subject of importance to the welfare of the raiyat and the administration of this extensive Government estate. It represents the experience not only of Mr. Taylor, but also of his father, who was intimately acquainted with the country and its people; and it bears numerous traces of the keen interest felt by the writer in his subject. Many of the suggestions regarding irrigation, crop experiments, communications, etc., should prove of great value in the management of the estate. The Board have in paragraph 5 of their letter summarised

the various questions raised and suggestions made by  
\* i, ii, vi, x, xii, xiii, xiv, xv, xvii,  
xviii, xix, xx, xxi and xxiv.  
Mr. J. H. Taylor, and as regards the items marginally noted\* it is understood that each will be dealt with separately, and where necessary Government orders obtained. With reference to item (iii) the Conservator of Forests will be consulted, while as regards item (xvi) it is open to the Commissioner, if he so thinks fit, to address Government on the subject. His Honour agrees that it is premature to discuss the procedure that should be followed in the next settlement, and is not prepared to re-open the question of the *Ekhrajat lands*.

9. The Lieutenant-Governor agrees with the Board, the value of whose opinion is enhanced by the exceptional knowledge of Orissa possessed by the Hon'ble Mr. Toynbee, in the high estimate they have formed of the ability with which these operations were conducted by the Assistant Settlement Officer, who has been lately specially promoted in recognition of his services, and his subordinates, specially Babu Jagannath Datta. To Mr. Maddox, and to the Director of Land Records, under whose guidance the work was conducted, credit is due.

Mr. R. C. Ewing's conduct of the troublesome survey was excellent. The assistance rendered to the Settlement Officers by the Forest Officer, Mr. C. C. Hatt, without which many difficulties must have arisen, and the cordial co-operation of the Subdivisional Officer, Mr. J. N. Gupta, c.s., merit the acknowledgment of the Government.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACKE,

*Secretary to the Government of Bengal.*

GLASGOW INTERNATIONAL EXHIBITION OF 1901.

The following papers are published for general information.

REVENUE DEPT.,  
The 14th July 1900.

## NOTICE TO PATENTEES.

## PATENTS, DESIGNS, AND TRADE MARKS.

46 &amp; 47 VIC., CAP. 57.]

[A.D. 1883.

*An Act to Amend and Consolidate the Law relating to Patents for Inventions, Registration of Designs, and of Trade Marks.*

## PART II.—PATENTS.

**Exhibition at Industrial or International Exhibition not to prejudice patent rights.** *Section 39.*—The exhibition of an invention at an Industrial or International Exhibition, certified as such by the Board of Trade, or the publication of any description of the invention during the period of the holding of the exhibition, or the use of the invention for the purpose of the exhibition in the place where the exhibition is held, or the use of the invention during the period of the holding of the exhibition by any person elsewhere, without the privity or consent of the inventor, shall not prejudice the right of the inventor or his legal personal representative to apply for and obtain provisional protection and a patent in respect of the invention of the validity of any patent granted on the application, provided that both the following conditions are complied with, viz.:—

- (a) The exhibiter must, before exhibiting the invention, give the Comptroller the prescribed notice of his intention to do so; and
- (b) The application for a patent must be made before or within six months from the date of the opening of the exhibition.

## PART III.—DESIGNS.

**Exhibition at Industrial or International Exhibition not to prevent or invalidate registration.** *Section 57.*—The exhibition at an Industrial or International Exhibition, certified as such by the Board of Trade, or the exhibition elsewhere during the period of the holding of the exhibition, without the privity or consent of the proprietor of a design, or of any article to which a design is applied, or the publication during the holding of any such exhibition of a description of a design, shall not prevent the design from being registered, or invalidate the registration thereof, provided that both the following conditions are complied with, viz.:

- (a) The exhibitor must, before exhibiting the design or article, or publishing a description of the design, give the Comptroller the prescribed notice of his intention to do so; and
- (b) The application for registration must be made before or within six months from the date of the opening of the exhibition.

## “PATENTS, DESIGNS, AND TRADE MARKS, ACT, 1883.”

“Upon the application of Sir J. D. MARWICK, of City Chambers, Glasgow, made to the Board of Trade on the 7th day of June 1898, the Board of Trade do hereby certify that the GLASGOW INTERNATIONAL EXHIBITION, proposed to be held in the year 1901 at Glasgow, in the County of Lanark, is an International Exhibition.

“Signed by order of the Board of Trade this Eleventh day of June 1898.

“FRANCIS J. S. HOPWOOD,

“Assistant Secretary, Board of Trade.”

## PROSPECTUS.

**T**HE Exhibition, which it has been decided to hold in Glasgow in the Summer of 1901, will, it is believed, be one of the most important International Exhibitions held in Great Britain in recent years.

Her Majesty the Queen has been graciously pleased to lend her patronage to the undertaking, and His Royal Highness the Prince of Wales has kindly consented to become Vice-Patron.

The undertaking has already met with hearty and widespread support among all classes, and in the list of Office-bearers will be found many of the leading Noblemen and Gentlemen of Great Britain and Ireland, as well as the civic heads of the principal towns of the United Kingdom. The Guarantee Fund now exceeds £447,000, and is still being increased.

The Exhibition will be held on the same site as that of 1888, and will be under similar control. While not following lines identical with those of the Exhibition of 1888, its attractions and success may reasonably be expected to surpass those of the former Exhibition, which was visited by over six millions of people, and left a clear surplus of £54,000. That surplus, with accumulated interest, has been supplemented by the subscriptions of private citizens to the amount of £74,346, and is being expended in the erection of Fine Art Galleries, which will form a principal part of the Exhibition building of 1901. When completed, these Galleries will have cost about £172,000.

The site, which extends to 67 acres, has been granted by the Corporation of Glasgow, and is one of exceptional beauty and convenience. It comprises the western portion of the Kelvingrove Park and the Bunhouse Grounds. The River Kelvin intersects it at various points, and the slopes of Gilmorehill, crowned by the University Buildings, constitute a dignified and appropriate boundary on the north.

The City itself lies in the centre of the great manufacturing and ship building industries of Scotland, and has a population of over three-quarters of a million. It is surrounded by densely populated districts, while Edinburgh and other large cities are within about one hour's railway journey. The tourist routes to the Western Highlands radiate from Glasgow.

The scope of the Exhibition will be wide and general. It is intended that it should present a full illustration of the Produce and Manufactures of the British Empire, its Dependencies, Dominions, and Colonies, and that an adequate representation from other countries should also be arranged. For these purposes special courts will be provided.

The Exhibition will be divided into sections, among which the following will receive particular attention, viz.:—“Fine Art History and Archaeology,” “Locomotion and Transport,” “Electricity,” “Labour-Saving Machinery,” “Marine Engineering,” “The Women’s Section,” and “Sports.” The Fine Art Section will be a very special feature of the Exhibition, and will include a large and extensive Collection of Sculpture and Paintings illustrative of Fine Art of the Nineteenth Century.

Musical Entertainments, both vocal and instrumental; Lectures, scientific and otherwise; Illuminations; Sports and recreations of every kind will be provided for the enjoyment of visitors. Restaurants, Tea Rooms, and other places of refreshment will be provided in the grounds; and Postal, Telegraphic, Banking, and other facilities will be available within the buildings for the convenience of the Exhibitors and of the public.

The buildings which it is proposed to construct will cover about 13 acres, in addition to the Permanent Art Galleries, and will be erected according to plans prepared by competent architects. The ornamental flower plots, pond, and fountains of the Kelvingrove Park will be included in the Exhibition Grounds; and the Terraces in front of the University are well adapted for the effective display of electric lighting and pyrotechnic illuminations, as well as for musical promenades and other entertainments, which it is intended to provide.

The River Kelvin will be available for the Exhibition of Naval Ship-building and Life-saving Apparatus, either in motion or stationary. The reach of the river which can be utilised for this purpose has a length of 1,500 feet, a width of 90 feet, and a depth of 6 feet.

The situation of the Exhibition Buildings is specially convenient of access for Exhibitors, as, by means of the lines of rails, which will be carried into the Exhibition Grounds at more than one point, heavy goods can be delivered at a minimum cost and with the least possible amount of risk. In addition to this, the port of Glasgow offers a cheap and ready means for the delivery and re-delivery of sea-borne goods.

It is requested that all communications in regard to the Exhibition may be addressed to **Mr. H. A. HEDLEY, General Manager and Acting Secretary.**

GLASGOW, April, 1899.

MISS T. MACKENZIE, 36 St. Vincent Place, Glasgow.

## REGULATIONS FOR EXHIBITORS.

1. An International Exhibition, under the patronage of Her Majesty the Queen, will be held in Glasgow in 1901. Date.
2. The Exhibition will be opened early in May, and will continue open for a period of about six months. Opening.
3. The principal objects to be exhibited are comprised in the accompanying Classification, which must not be considered to be exhaustive. Objects.
4. It is not intended to issue any awards. Non-competitive.
5. Charge will be made for space, except in special cases to be determined by the Exhibits and Space Committee. The charge for space inside the building will be 3s. per square foot, with a minimum charge of £5. Whatever vacant space Exhibitors require around their exhibits, beyond the usual passages, will have to be paid for. Exhibitors requiring wall-space only must mention the fact when making application, when they will be informed on what conditions it will be granted. Space in the grounds will be let on special terms to be arranged by the Committee, but in such cases plans must accompany the application, and all surface damage must be made good by the Exhibitor on removal. Payment to the extent of 25 per cent. of the amount payable must accompany all applications, and the balance must be forwarded on receipt of the notice of allotment. In no case, however, can the deposit be less than the minimum charge of £5. Exhibits will not be admitted until payment for space has been made in full. Spaces not occupied seven days previous to the opening of the Exhibition will be otherwise allotted, and all payments made in respect thereof absolutely forfeited. Exhibitors will have to pay all expenses of conveying, delivering, arranging, fixing, and removing their exhibits, and also the cost of the erection of all fixtures, screens, and counters required; and they must personally, or by a representative, superintend the transmission, reception, unpacking, installation, and (at the close of the Exhibition) the removal of their goods. The Executive Council reserve to themselves the right of doing whatever may be considered necessary at the expense of the Exhibitor, unless this regulation is strictly complied with. The Executive Council will not be responsible for any loss of exhibits by theft, or for any loss or damage to exhibits, from any cause whatever. Expenses to be borne by Exhibitors.
6. Steam, and power from the main shafting, will be supplied to Exhibitors in the Machinery Hall by the Executive Council free of charge, and subject to special regulations. Exhibitors requiring motive power must fill up the special Application Form which has been prepared for this Section, and which will be supplied by the General Manager upon application. Exhibitors requiring counter-shafting, pulleys, belting, cables, pipes and fittings must supply these at their own expense. Motive Power.
7. Schedules of Applications for Space and for Power may be had from the General Manager, Mr. H. A. HEDLEY, 36 St. Vincent Place, Glasgow. These must be filled up and returned on or before 1st June 1900. The decision of the Exhibits and Space Committee will be notified as soon as possible after that date. Applications for Exhibits.
8. The nature of the articles which it is proposed to exhibit must be fully specified in the Form of Application for Space, and no article which is not clearly described in the Application Form will be allowed in the Exhibition without the special permission of the Exhibits and Space Committee. Nature of Exhibits.
9. The Executive Council reserve the right to refuse any exhibit, without stating any reason for so doing. Right to refuse Exhibits.
10. The Foreign and Colonial Commissioners or Commercial Agents appointed by the respective Governments are invited to communicate with the General Manager. The Executive Council will place at their disposal all information and plans that may be useful to them. Foreign and Colonial exhibits.
11. Applicants for space from countries in which no Commissioner or Agent has been appointed will correspond directly with the General Manager. Foreign Countries.
12. The Executive Council will endeavour to obtain from the various Railways, Steamship Companies, and Carriers special terms for the conveyance of Exhibitors' goods to and from the Exhibition, and these arrangements will be communicated to intending Exhibitors. Railway Rates.
13. All packages containing goods for Exhibition must have painted on two sides the distinctive mark  The name and address of the Exhibitor, and the allotment Marks on Packages.

distinctive mark

G.I.E.  
1901

The name and address of the Exhibitor, and the allotment

number of the space must also be given. Labels for this purpose will be supplied to each Exhibitor.

**Marks on Foreign Packages.** 14. Packages from foreign Countries must likewise have painted on two sides the

distinctive mark  They must also be marked in such a way as to show distinctly

Glasgow. Foreign

the name of the Exhibitor and the country from whence they come, as well as the allotment number of the space.

**Dimensions of Cases, &c.** 15. No case, counter, platform, screen, or partition must (without special permission) exceed the following dimensions:—

Show Cases and Partitions	...	... 8 feet above the floor.
Counters	...	... 2 feet 6 inches above the floor.
Platforms	...	... 1 foot above the floor.

NOTE.—In the Machinery Section, partitions must not exceed the height of the handrails.

**Railings and Canopies.** 16. Exhibitors may erect railings around their stands, and provide canopies, subject to the approval of the General Manager; these railings and canopies, must be within the area of the space allotted. In the case of machinery in motion, it is imperative that it be sufficiently *railed*. Such railings must be of a uniform design, details of which will be supplied on allotment of space.

**Flooring.** 17. The flooring must not be altered, removed, or strengthened, except by sanction of the General Manager, and at the expense of the Exhibitor.

**Obstructions.** 18. Nothing must be erected, placed, or displayed by Exhibitors in such a manner as to obstruct the light, project beyond the space allotted, impede the view along the open spaces, or occasion injury or inconvenience to other Exhibitors.

**Decorations.** 19. In order to insure uniformity of decoration, no Exhibitor will be allowed to put up flags, banners, or other kind of decoration without the permission of the General Manager. For covering counters, screens, or partitions, a material will be selected, which may be bought by Exhibitors at the building.

**Sign-boards.** 20. Sign or name-boards, which require to be new and clean, and of a reasonable size, must be approved by and be placed to the satisfaction of the General Manager, and must in no case interfere with the lighting. They must be black, with gold letters. Special instructions regarding signs in the Machinery Section will be issued with the allotment letters.

**Hand-bills.** 21. All hand-bills, printed matter, &c., connected with exhibits, placed in or upon stands or cases, or intended for gratuitous distribution, must first receive the approval and authority of the Exhibits and Space Committee, which permission may be withdrawn at any time.

**Empty Cases.** 22. Cases must be unpacked immediately on arrival, and the empty cases removed by the Exhibitors or their agents. The Executive Council cannot accept any responsibility with reference to empty cases, which must be at once removed from the buildings at the expense of the Exhibitors. The Executive Council reserve to themselves the right of doing whatever may be considered necessary, at the expense of the Exhibitors, unless this rule is strictly complied with. The Executive Council will endeavour to arrange with Contractors to undertake the storage of cases at a fixed tariff, particulars of which will be intimated to Exhibitors.

**Attendance.** 23. Exhibitors will require to provide all necessary attendance, and to keep their stands and exhibits properly cleaned and in good order during the whole period of the Exhibition. All stands must have the covers removed by 10 A.M., and remain open till 9 P.M. The Executive Council reserve the right to impose a penalty for a breach of this Regulation, and to order the removal of any attendant whose behaviour they consider unseemly.

**Non-transfer Space.** 24. No Exhibitor will be allowed to transfer any portion of the space allotted to him, or to allow any other than his own duly-admitted exhibits to be placed thereon, except by permission of the Executive Council.

**Name.** 25. All goods must be exhibited in the name of the individual or firm signing the Application Form.

**Selling.** 26. Exhibitors will be at liberty to make the selling price of the articles exhibited, for the information of visitors, to whom they may explain their exhibits; but they must not, unless special permission in writing has been obtained from the Exhibits and Space Committee, invite or allow visitor to purchase goods for removal at the time of purchase. Orders can be taken within the Exhibition, but the goods must be delivered from establishments outside. Special regulations will, however, be made with regard to articles manufactured in the Exhibition.

27. No exhibit, or part thereof, can be removed before the close of the Exhibition, Removal, without the special permission of the Executive Council. Exhibits not removed within fifteen days after the close of the Exhibition will be warehoused at the cost and risk of the owners, and whatever may remain after three months will be sold by auction, and the proceeds applied to defray expenses.

28. No goods will be received prior to November 1900, without special permission, Date of nor after 15th April 1901; but prior arrangements may be made for motors, boilers, or Reception. any exhibits requiring under-building.

29. Special care will be required by the Executive Council, who may make special Fire Risk regulations, in cases where fire or gas is used by Exhibitors, and a responsible officer will be appointed to carry out the injunctions of the Council in this respect. Exhibitors will require to effect their own insurance on their exhibits.

30. No explosives, or any substance which, in the judgment of the Executive, are Dangerous Substances, dangerous, will be admitted, but they may be represented by models.

31. Spirits, oils, corrosive substances, and generally all substances which might spoil other articles or inconvenience the public, can only be exhibited in solid and suitable vessels. Spirits, Oils, &c.

32. The Executive Council reserve to themselves the right of examining or testing Testing. Damage caused by Exhibitors. any of the exhibits. If any damage or injury shall be occasioned during the Exhibition by any exhibited machine, implement, or article, to any visitor or other person, then the Exhibitor to whom such machinery, implement, or article may belong shall be responsible for such damage or injury; and in the event of any claim being made against the Council in respect of such damage or injury then the Exhibitor shall indemnify and hold harmless the said Council from or against all actions, suits, expenses, and claims on account or in respect of any such damage or injury which may be so caused.

33. No article exhibited may be copied, photographed, drawn, or reproduced in any Photography, &c. manner, without the special permission of the Exhibitor and of the Executive Council.

34. Passes to the Exhibition will be granted to Exhibitors, and to a reasonable number of attendants. If these passes be used by any but those to whom they are issued, they will be immediately cancelled. Passes.

35. The Executive Council reserve to themselves the sole right of compiling and Catalogue. printing a Catalogue of Exhibits, under regulations which will be duly notified.

36. The right to alter, amend, add to, or cancel any of these Rules, and to grant Right to alter Rules. relaxation from them in individual cases, is reserved by the Executive Council.

37. All who become Exhibitors shall be held by so doing to signify their compliance Rules binding. with the whole of these Regulations, together with such other Regulations as the Executive Council may issue from time to time.

38. The Executive Council reserve the right to remove the exhibits of any one who does not conform to the Regulations. Right of Removal.

39. The Executive Council will not be responsible for loss or damage occurring Non-Liability. from any cause whatsoever to any exhibit or other property belonging to any Exhibitor or any other person.

## APPLICATION FOR SPACE.

To the GENERAL MANAGER,  
36 ST. VINCENT PLACE, GLASGOW.

Please allot the following amount of Space at the charge of Three Shillings per square foot, amounting to £ : : , for the exhibition of the Articles described on next page.

FLOOR SPACE ... feet long  $\times$  feet broad = feet super.  
WALL SPACE (only) feet high  $\times$  feet wide = feet super.

In case of Application being granted (in whole or part), declare that will adhere to the published Regulations of the Exhibition.

Signature, \_\_\_\_\_

Address, \_\_\_\_\_

Date, \_\_\_\_\_

enclose Cheque for £ : : , being a deposit of 25 per cent. of the amount payable.

Cheque to be made payable to the Clydesdale Bank, Limited.

NOTE.—The deposit in no case to be less than the minimum charge of £5.

### INSTRUCTIONS.

Application for Space in the Machinery Section and for Motive Power, &c., must be made on a Special Form, which will be supplied on application to the GENERAL MANAGER.

Applications must be sent in not later than the 1st June 1900.

A sketch showing the shape of the Space required and an Elevation of the Stand, must accompany the application.

The charge for Space inside the Building will be 3s. per square foot, with a minimum charge of £5. Whatever vacant Space Exhibitors require around their Exhibits, beyond the usual passages, will have to be paid for, and Exhibitors requiring Wall Space only must mention the fact when making application, when they will be informed on what conditions it will be granted. Space in the Grounds will be let on special terms to be arranged by the Committee, but in such cases plans must accompany application, and all surface damage must be made good by the Exhibitor on removal. Payment to the extent of 25 per cent. of the amount payable must accompany all applications, and the balance must be forwarded on receipt of the notice of allotment. In no case, however, can the deposit be less than the minimum charge of £5. Exhibits will not be admitted until payment has been made in full. Space not occupied seven days previous to the opening of the Exhibition will be otherwise allotted, and all payments made in respect thereof absolutely forfeited.

\**Description of Articles to be Exhibited.*

*Class in which it is desired to exhibit.*

If the Applicant desires that a reference to the Exhibit should appear in the Catalogue under other Classes, besides the Class in which the Exhibit is shown, such Classes should be given here.

*Special Features and Description of Articles to be Exhibited; Explanations and General Remarks.*

*State whether it is proposed to show Machines, Models, Parts of Machines, Specimens, Examples, &c.*

*If it is desired to illustrate a Manufacturing Process, state its nature.*

 *State whether it is desired to show a Machine, &c., at Work, and whether Steam or Power are needed, and give particulars.*

\* REGULATION 8.—The nature of the Articles which it is proposed to Exhibit must be fully specified in the Form of Application for Space, and no Article which is not clearly described in the Application Form will be allowed into the Exhibition, without the special permission of the Executive Council.

 A Special Application Form must be filled up for the Machinery Section, which will be supplied on application to the General Manager.

## MACHINERY HALL.

## GLASGOW INTERNATIONAL EXHIBITION, 1901.

## APPLICATION FOR SPACE IN MACHINERY HALL.

*To the General Manager,*

36 ST. VINCENT PLACE, GLASGOW.

*Please allot.....the following amount of Space, at the charge of Three Shillings per square foot, amounting to £ : : , for the exhibition of the Articles described on the next page.*

FLOOR SPACE ... feet long × feet broad = square feet.

*In case of.....Application being granted (in whole or part), .....hereby declare that.....will adhere to the published Regulations of the Exhibition.*

*Signature,* \_\_\_\_\_*Address,* \_\_\_\_\_*Date,* \_\_\_\_\_

.....enclose Cheque for £ : : , being a deposit of 25 per cent. of the space charge.

Cheques to be made payable to the Clydesdale Bank, Limited.

NOTE.—The deposit in no case to be less than the minimum charge of £5.

## INSTRUCTIONS.

Applications must be sent in not later than 1st June 1900. Space not occupied seven days prior to the opening of the Exhibition will be otherwise allotted, and all payments in respect thereof absolutely forfeited.

A Scale drawing  $\frac{1}{4}$ -inch to the foot, must accompany this Application, showing in outline, the position of each machine; and in the case of machinery in motion, of the pulleys and drains, and the steam, water gas, or electrical connections.

Motive power from the main shafting (running at about 150 revolutions per minute) and steam power (at from 100 lbs. to 250 lbs. pressure, as may be arranged) will be supplied free of charge, and additional power can be supplied at the following rates:—

Electricity—Motive power up to 5 H.P., at 250 volts. ... ... }  
" above " at 500 " ... ... } at 2d. per unit.  
Cooking and Heating, at 250 volts. ... ... }

Gas—To Exhibitors of Gas Appliances, ... ... ... Free.

To other Exhibitors ... at Corporation rates (now 2/2 per 1,000 cubic ft.)

Water—High pressure ... ... at Corporation rates.

Gravitation—To Exhibitors manufacturing in the Exhibition by meter, at 4d. and selling their produce. } per 1,000 gallons.

" \*To other Exhibitors ... ... ... Free.

\* Exhibitors of Pumps, &c., using large quantities of water, must erect storage tanks to avoid waste, and cannot draw direct from the water mains.

NOTE.—Exhibitors must supply, at their own cost, any pulleys, counter-shafting, belting, cables, pipes, and fittings they may require for connecting to the mains and shafting.

The whole Exhibition will be lighted by electricity, but if Exhibitors desire additional electric lights inside their space, these will be supplied at a charge, to include wiring, fixing, and maintenance, of 30/- per 16-candle-power incandescent lamp.

It is imperative that all machinery shall be properly railed, and, for this purpose, and to insure uniformity, the Machinery Committee have selected for use a hand-railing, 3 feet high, having angle brackets fixed on top of the standards to carry a 12-inch sign or name-board, which must be black, with gold letters. The design and cost at which these railings can be supplied will be sent to Exhibitors with the allotment letters.

No overhead sign-boards, or offices or partitions, can be erected without the special permission of the Machinery Committee, and they can only be permitted where they will not obstruct the view over the whole Machinery Hall.

All oily waste or other inflammable substances must be removed immediately, and cannot be allowed to be stored on any exhibiting space.

The machinery will be in motion from 10 A.M. till 8 or 9 P.M., with intervals for meal hours, but the Executive Council will not hold themselves responsible for any stoppages which may occur from any cause whatsoever.

Copy forwarded to the Local Governments and Administrations noted in the margin and to the Foreign Department, for information, with reference to this Department's Circular Resolution No. 23—27-11, dated the 3rd July 1900.

By order,

E. MACONOCHEE,  
*Under-Secy. to the Govt. of India.*

**RESOLUTION ON THE ANNUAL RETURNS ON THE WORKING  
OF THE CHARITABLE DISPENSARIES IN BENGAL  
FOR THE YEAR 1899.**

MUNICIPAL DEPARTMENT.—MEDICAL.

*Calcutta, the 20th July 1900.*

RESOLUTION—No. 2353Med.

**READ—**

The Annual Returns on the working of the Charitable Dispensaries in Bengal for the year 1899.

**Read again—**

The Triennial Report on the working of the Charitable Dispensaries in Bengal for the three years 1896, 1897, and 1898, and the Resolution recorded on it.

The detailed report on the administration of the Charitable Dispensaries in Bengal, which is prepared by the Inspector-General of Civil Hospitals once in three years, was submitted last year, and he has therefore on this occasion forwarded, with brief notes, the usual annual returns showing the working of those institutions during 1899.

2. *Number of Dispensaries.*—The number of dispensaries open on the 31st December 1898 was 488. Twenty-nine institutions were newly established, and four were closed during the year. There were thus 513 open on the 31st December 1899. Of the 29 opened during the year, 18 were established by District Boards. The district in which most was done during the year was that of Rangpur, where seven new dispensaries were opened, and sanction obtained to the establishment of two more. In addition to the dispensaries shown on the Government list there are many institutions maintained by private charity which have hitherto not appeared on it. Arrangements are now being made to secure, as far as possible, their inclusion in the statistical returns. Notwithstanding the steady increase in the number of dispensaries the Inspector-General of Civil Hospitals remarks that there are many centres and places in Bengal which are still inadequately provided with medical relief. His suggestions on the subject have been communicated to the local authorities.

3. *Patients.*—The total number of in-door and out-door patients treated rose from 42,086 and 2,837,759 in 1898 to 47,897 and 3,243,346, respectively, in 1899. These figures do not include 74,391 patients who were treated during the year under review by the Missionary doctors of the Ranaghat Monro Medical Mission and by the peripatetic Hospital Assistants employed on railway lines and in dispensaries opened temporarily during epidemics and fairs. Including them, the percentage of population treated was 4·65 against 4·07 in the previous year. The average daily attendance of in-patients and out-patients increased from 1,868·4 and 19,467·6 in 1898 to 1,976·5 and 22,589·7, respectively, in 1899. The attendance of in-patients has not yet returned to the position it held previous to the plague scare; but the number of out-patients is by far the largest ever recorded.

4. In view of the fact that the general mortality figure of the year 1899, though higher than that recorded in 1898, was considerably lower than in any of the four preceding years, this increase can only be attributed to the growing popularity of dispensaries. Civil Surgeons are to be congratulated on this result, and on the general improvement in their dispensaries which it indicates. A curious exception to the general increase is the considerable decline in the attendance at two dispensaries in the Murshidabad district. Considering that malarial fever was extraordinarily prevalent in this district in 1899, and that the fact was specially noticed by the Civil Surgeon in his annual Sanitary Report, it is surprising to find the decline ascribed in one of these cases to the better health of the locality.

5. *Diseases treated.*—As usual malarial fevers contributed the largest number of cases treated at the dispensaries, forming 18·9 per cent. of the total number of cases treated, against a percentage of 18·3 in the previous year. The increase of fever cases from 527,695 in 1898 to 623,173 in 1899 was spread over 39 districts, and is attributed to the heavy rains of the year. Next

to malarial fever, diseases of the skin, of which the exact nature is not specified, show the largest number of cases, viz., 501,830 against 402,890 in the previous year. 8,583 cases of dysentery, and 87,477 of diarrhoea were treated during the year, showing an increase under both heads together of 13,943. The fact that this increase is nearly four times that of the general mortality under these heads is a special testimony to the growing popularity of the dispensaries. The number of cases of cholera rose from 6,426 to 10,638. The highest figures under the head of cholera are returned by the district of Backergunge (1,099). Next in order come Cuttack (884) and Puri (751) where a heavy mortality from that cause occurred among pilgrims during the Car festival. The Rajshahi Division also shows a large increase over the figures of the preceding year; the Pabna, Bogra, and Rajshahi districts having suffered very much from the disease during the year. The number of lepers treated was 3,042 against 2,951 in 1898, the highest figures being reported from Gaya (97), Cuttack (66), Dacca (65), Darbhanga (61), and Patna and Puri (58 each). The number of small-pox cases treated was, as usual, insignificant.

6. *Surgical operations.*—During the year 143,614 principal and 1,765 secondary operations were performed in dispensaries against 134,547 and 2,576, respectively, in 1898. The number of persons operated on was 142,761. Of

these 136,959 were cured, 4,437 relieved, 1,009 discharged, and 230 died. The head-quarters dispensaries named in the margin have the largest record of operations. Of the more important operations 2,682 were extractions of the lens. The number of cases of lithotomy rose from 127 to 160 and of litholapaxy from 72 to 102 in 1899. Cases of ovariotomy also increased from 8 to 9, of which 7, or 77·7 per cent., were successful—a result very creditable to the operators.

7. The following officers performed more than a hundred operations during the year:—

Major C. E. Sunder (Gaya)	...	...	...	329
Captain Lt. H. Maddox (Saran)	...	...	...	154
Major E. H. Brown (Muzaffarpur and Purnea)	...	...	...	119
Captain B. H. Deare (Midnapore)	...	...	...	118
Assistant Surgeon Bepin Bihari Gupta (Dumraon)	...	...	...	177
" " Rajani Kanta Das Gupta (Barrackpore and Bihar)	...	...	...	174
" " Lalit Mohan Laha (Patna)	...	...	...	129
" " Kali Prasanna Lahiri (Bihar and Darbhanga)	...	...	...	109

8. *Class and sex of patients.*—The total number of females treated during the year, both as in-door and out-door patients, was 517,858 against 462,412, showing an increase of 55,446. Although this represents but a small fraction of the female population of these provinces, the advance is satisfactory. The number of males treated rose from 1,762,033 to 2,020,734, and the number of children from 655,400 to 752,651. There was an increase of 184,997 in the number of Muhammadans and of 235,790 in the number of Hindus.

9. *Income*—The opening balance of the year under report, Rs. 50,078 is more than the balance shown at the close of the previous year by Rs. 5,004. The difference is explained to be due to the correction of the accounts of certain dispensaries, the closure of one institution, from which no return had been received, and to one institution having submitted its accounts for the first time during the year. The total income of the dispensaries, inclusive of the opening balance, was Rs. 10,01,879-6-3, or Rs. 87,405-13-8 in excess of that of the previous year, which is accounted for chiefly by increased contributions from municipal and other local bodies, under which heads there is an advance from Rs. 1,86,124-7-1 and Rs. 2,47,107-9-2 to Rs. 2,24,758-10 and Rs. 2,75,252-14-10, respectively. On the other hand, subscriptions from Europeans and Natives fell to Rs. 2,56,278-15, or 25·5 per cent. of the total income, from Rs. 2,58,391-4-6, or 28·2 per cent. in 1898. Government contributed Rs. 9,834-11 more than in the preceding year. The amount received as interest on investments fell by Rs. 2,873-12-10, and receipts from paying patients by Rs. 196-6-7. The amount received by the sale of securities and withdrawal of deposits was Rs. 28,983 against Rs. 23,129.

10. The attention of Government was drawn during the year to the fact that while there has been of late years a large increase in the total amount of

subscriptions to charitable dispensaries, the increase has not been extended to all classes of dispensaries alike, the decline being specially marked in cases where the dispensary has been up to a certain point maintained exclusively by private subscriptions and has then been transferred to the management of a local authority. With a view to remedy this state of things and to make as clear a distinction as possible between expenditure on charitable objects and expenditure on ordinary municipal administration, instructions were issued to the local authorities that the appointment of really representative managing committees should be made the rule, and that it should be made clear, by fixing for a short period the amount contributed by the local body, that the dispensary would receive the full benefit of all charitable contributions. It is hoped that this arrangement will result in an increase of subscriptions.

11. *Expenditure.*—The gross expenditure on dispensaries, exclusive of the amounts invested, was Rs. 9,02,690-8-2, showing a total increase of Rs. 64,259-2-9. This increase is shared by all items of expenditure except "salaries of nursing establishment" and "diet" which show a decrease. The largest increase was under the head "paid from local sources on buildings or repairs," viz., Rs. 30,898, which is ascribed chiefly to the construction of new buildings. Establishment charges increased by Rs. 15,452 owing chiefly to the addition of new dispensaries. The cost of diet was Rs. 77,673 against Rs. 80,605, and is attributed to the cheaper rates of food-grain. The increase in the number of patients treated during the year brought about a corresponding increase in the cost of bazar and European medicines. Owing to the improvements made in many dispensaries in clothing, bedding, and furniture, miscellaneous charges increased from Rs. 67,845 to Rs. 83,479. It is satisfactory to observe that after meeting all these increased charges, a sum of Rs. 29,434 was invested during the year, and the year closed with a credit balance of Rs. 69,754 against Rs. 45,074 in 1899. In dealing with operations Colonel Hendley remarks that more patients will come from a distance to be operated on if their travelling expenses are paid by the dispensary authorities; and suggests that funds should be provided by the managing committees for this purpose. The Lieutenant-Governor trusts that this will be done, if at all, only in the most exceptional cases. It is most undesirable that anything should be done which has the appearance of subsidising people to accept relief of this kind; and dispensaries are, as a rule, sufficiently accessible to obviate the necessity of any such grants being made.

12. *Inspection.*—One hundred and ninety-five dispensaries were inspected by the Civil Surgeons four times (the minimum fixed by the Dispensary Manual) or upwards during the year as against 177 in 1898. Although the figures show improvement, the results are still far from satisfactory. Out of 55 dispensaries which had, under the orders of the Inspector-General of Civil Hospitals, to be inspected three times during the year, there was a failure on the part of the Civil Surgeons and Civil Medical Officers to pay the prescribed number of visits in the cases of 33 dispensaries. Similarly, in the case of 51 dispensaries, for which two visits are required, there was a default in the cases of 19 dispensaries. The Lieutenant-Governor desires that the attention of the Civil Surgeons and Civil Medical Officers should again be drawn to the importance of the matter. Colonel Hendley personally inspected 43 dispensaries at district head quarters, two at subdivisions, seven out-lying dispensaries, and ten Lady Dufferin and separate female hospitals. Besides these, he visited the Eden Sanitarium at Darjeeling, Hazaribagh Mission Hospital, Cuttack Protestant Orphanage, the emigration depôts at Purulia, the cholera hospitals at Barisal, Chittagong, and Puri, the lodging-houses at the latter place, and the plague camps at Goalundo and Khurda Road. He also reported on 37 police hospitals and 37 jails, three of which were visited twice. The medical schools at Dacca, Bankipore and Cuttack were also inspected by him during the year. The thanks of the Lieutenant-Governor are due to Colonel Hendley for the energy, industry, and ability with which he has administered the Department during the year. There are few branches of the administration in which there has been such uniform and gratifying improvement.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

## WEATHER AND CROP REPORT.

*For the week ending the 23rd July, 1900.*

**Burdwan.**—Rainfall at Sadar 0·27, Kalna 2·47, Katwa 3·29, Raniganj 1·44. Rain wanted generally. Transplantation of *aus* and *aman* going on. Fodder and water sufficient. Common rice selling as follows:—

	Srs.
Sadar	... 13

Test-works	... 387	359	122	868
Kitchens	... 89	303	352	744
Relieved by Charitable Fund	... 157	331	168	656

**Manbhumi.**—Rainfall at Sadar 0·38, Gobindpur 1·11. Weather hot and sultry. *Bhadoi* crops flourishing. Transplantation of winter rice is retarded in the south-east of the district for want of rain. Cattle-disease reported from thanas Gourangdi and Raghunathpur. Fodder and water sufficient. Average price of common rice at Sadar 11 $\frac{1}{2}$  seers and at Gobindpur 11 seers per rupee. Supply sufficient.

**Singhbhum.**—Rainfall 1·14. Transplantation continues. More rain is needed. Average price of rice 11 seers 5 chitaks per rupee in the district, but in Chaibassa and near the railway it is 10 seers per rupee.

**General Summary.**—There was general but unevenly distributed rainfall during the week, the amount being scanty in Orissa, the Burdwan Division, and Chota Nagpur. Autumn crops and sugarcane are generally promising. In Tippera, Bhagalpur, Malda, and the Rajmahal subdivision of the Sonthal Parganas some damage from excessive rain is reported. The transplantation of winter rice is proceeding, but more rain is still required in the Burdwan Division, and in the 24-Parganas, the Jamtara subdivision of the Sonthal Parganas, Angul, Manbhum, and Singhbhum. Fodder is generally sufficient. Some cattle-disease is reported, but generally the cattle are in good condition. The price of rice has risen in 23 districts, has fallen in 8, and is stationary in the rest.

CHARLES YOUNG,  
for Auditor of Accounts.

GORAKHPUUR,  
The 14th July 1900.

## Weekly Return of Traffic Receipts on Indian Railways.

## EAST INDIAN RAILWAY.

Approximate Return of Traffic for week ended 7th July 1900 on 1,836·15 miles open.

	COACHING TRAFFIC.		MERCHANTILE AND MINERAL TRAFFIC.		Other earnings (estimated).	Total earnings.	TRAFFIC TRAIN-MILES RUN.		
	Number of passengers.	Coaching receipts.	Weight carried.	Receipts.			Coaching.	Merchan- dise.	Total.
Total traffic for the week ...	(a) 393,897	Rs. A. P. 4,48,903 15 0	Mds. 8. 50,34,319 20	Rs. A. P. 9,34,648 9 0	Rs. A. P. 22,470 0 0	Rs. A. P. 14,06,072 8 0	Rs. A. P. 113,717	Rs. A. P. 290,581	Rs. A. P. 314,298
Or per mile of railway ...	244 7 8	.....	.....	509 0 10	12 3 10	765 12 4	.....	.....	.....
For previous week of half-year ...	.....	.....	.....	.....	.....	.....	.....	.....	.....
Total for 1 week ...	393,897	4,48,903 15 0	50,34,319 20	9,34,648 9 0	22,470 0 0	14,06,072 8 0	113,717	290,581	314,298
COMPARISON.									
Total for corresponding 8 days of previous year	425,603	4,54,370 9 5	45,59,139 10	8,06,050 12 6	16,633 6 4	12,77,123 12 3	110,418	197,399	307,817
Per mile of railway corresponding period of previous year ...	.....	265 9 9	.....	471 3 1	9 12 2	746 0 0	.....	.....	.....
Total for corresponding 1½ weeks of previous year ...	425,600	4,54,370 9 5	45,59,139 10	8,06,050 12 6	16,633 6 4	12,77,123 12 3	110,418	197,399	307,817

(a) The increase is chiefly due to the conveyance of transport mules and horses for the China expedition.

(b) The increase is chiefly in food-grains and sundry articles from stations in the Loop, Gaya, and Allahabad districts.

1900.

Abstract of progressive weekly returns of all earnings for 1900 in comparison with 1899.

Open mileage.	Period.	Coaching Traffic.		Merchandise and Mineral Traffic.		Other earnings.	Total.	Per mile of railway.	Train mileage.
		No. of passengers.	Rs.	Mds.	Rs.	Rs.	Rs.	Rs.	No. Rate.

RESOLUTION ON THE ANNUAL REPORT ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1899.

RESOLUTION—No. 2869J.

POLICE.

*Dated Calcutta, the 28th July 1900.*

READ—

The Annual Report on the Police Administration of the town of Calcutta and its suburbs for the year 1899.

The Annual Report of the Chief Presidency Magistrate.

The Annual Report of the Presidency Magistrate of the Northern Division.

Read also—

The Reports for the two previous years and the orders of Government recorded thereon.

MR. JAMES held the office of Commissioner of Police during the year; he was on leave for three months from 14th July to 14th October, and Mr. Showers acted for him. The report has been submitted two months

late, but no explanation has been given of the delay. The Lieutenant-Governor trusts that in future it will be found possible to submit the report, with accurate figures, on the proper date.

2. The following table shows the total number of cognisable and non-cognisable offences reported in the town and suburbs during each of the last five years:—

	1895.	1896.	1897.	1898.	1899.
Town ...	45,291	51,855	52,866	65,058	61,235
Suburbs ...	13,589	15,064	13,761	13,428	14,837
—	—	—	—	—	—
Total ...	58,880	66,919	66,627	78,486	76,072
—	—	—	—	—	—

It was noticed in last year's Resolution that the abnormal rise in the figures for the town in 1898 was entirely due to an enormous increase in the number of applications for summonses under the Municipal Act. During the year under report the number of such applications shows a decrease from 33,105 to 28,946. A very large majority of these, as before, related to failure to take out licenses, and out of 28,374 applications made to the Honorary Presidency Magistrates, no less than 11,091 were struck off before hearing, while the accused were acquitted or discharged in 10,135 cases, and convictions were obtained only in 7,034 cases or 24·4 per cent., of the complaints. These figures show clearly that the improper use of criminal process for realising the dues of the Municipality and the waste of the Court's time which were animadverted on in the Resolution for 1898 continued during the year 1899. The new Calcutta Municipal Bill, however, provides a simpler method of recovering these taxes without the intervention of the courts, and the relief thus afforded will be very welcome.

3. The following table compares the crime reported during the last five years in the town and suburbs together, showing separately cognisable and non-cognisable crime, and distinguishing offences under the Penal Code from offences under miscellaneous laws:—

	1895.	1896.	1897.	1898.	1899.
<b>Cognisable—</b>					
Penal Code ...	6,836	8,116	9,109	8,786	9,264
Miscellaneous	24,392	26,714	28,019	26,708	25,018
<b>Non-cognisable—</b>					
Penal Code ...	6,760	6,608	6,259	5,479	5,705
Miscellaneous	20,892	25,481	23,240	37,513	36,085
—	—	—	—	—	—
Total ...	58,880	66,919	66,627	78,486	76,072
—	—	—	—	—	—

There has been an increase during the year of offences under the Penal Code, though the number of convictions under that Code has decreased. The falling off in the number of offences under Miscellaneous Laws is amply accounted for by the decrease noted above in municipal cases.

4. The statement below shows the cognisable and non-cognisable cases which were sent up by the police or taken up direct by the Magistrates during

the last two years, also the number tried and their results, with the division of work between the courts of the Presidency and Suburban Magistrates:—

Court.	Cases Instituted.			Cases Tried.			Number of Cases Ending in Conviction.				
	Cognisable cases sent up by the police.	Cognisable cases taken up by the Magistrate direct.	Non-cognisable cases.	Cognisable cases sent up by the police. \* By Magistrate.

† By High Court.

‡ By Sessions.

The total number of cases tried in the town and suburbs during the year was 43,563, a slight increase on last year, and the percentage of convictions rose from 89·67 to 90·17. The police sent up 28,056 cognisable cases, and obtained convictions in 96·73 per cent. of them. The Magistrates took up 2,391 cognisable cases direct, of which 1,242 came on for trial, and of these 702, or 5·6 per cent., ended in conviction. It would seem that sufficient care is not exercised before the issue of processes. In the Northern Division Court, out of 1,170 cognisable cases, 475 were dismissed before trial, but of the 695 remaining, 301 or nearly half were abandoned; again out of 1,574 non-cognisable cases in the Southern Court 92 were dismissed without trial, but of the remaining 1,482, no less than 901 were abandoned. Almost the whole of the non-cognisable cases before the Bench Court were under the Municipal Act. The number of whippings is small, and only 15 boys were sent to the reformatory schools. As a very large number of juvenile offenders must be brought before the courts in Calcutta every year, the Lieutenant-Governor trusts that, though no mention is made of it, the provisions of section 562, Criminal Procedure Code, are known and freely employed, and that boys convicted of first offences are not being committed to jail.

5. One hundred and thirty-one cases were declared false, and prosecutions were instituted in 44 instances. Convictions followed in 30 of these cases, but the sentences imposed were in no sense deterrent. Out of 17 persons convicted in the town, one was sentenced to a month's rigorous imprisonment, and the rest to fines averaging Rs. 12 each. Such a result is lamentable: the offence of bringing a false charge is a very serious one, and if it is brought home to the accused, a small fine is an utterly inadequate punishment. Very little use was made of the provisions of section 250, Criminal Procedure Code, which were applied in only four cases during the year.

6. *Property stolen and recovered.*—The value of property stolen in the town and suburbs was Rs. 2,50,104, of which property to the value of Rs. 1,21,546 or 48·5 per cent. was recovered. The percentage of recoveries was much lower than last year when 61·7 was recovered.

7. *Cognisable offences in the town.*—The number of cognisable offences in the town fell from 25,796 to 23,947, but the decrease was almost entirely in the offences under the head of special and local laws, while serious offences against person and property, and minor offences against property

show an increase. There were 16 cases relating to coinage against 10 last year. Twelve persons were sent up for trial, of whom nine were convicted. There was one case of robbery with murder in which the accused was sentenced to death. There were two other cases of murder; in one the accused committed suicide, and in the other no clue could be obtained. The number of cases of hurt by dangerous weapons increased from 79 to 130, and the figures for grievous hurt and kidnapping also show an increase. Ninety-one true cases of burglary were reported against 85 last year, but detection followed in only 59 cases against 73 last year: most of the cases occurred in *kutcha* houses. Thefts increased from 1,062 to 1,327, of which 930 cases were detected and ended in the conviction of 857 persons against 855 last year. After a noticeable decrease for two years, the number of cases of criminal breach of trust rose from 153 to 193, of which 79 ended in conviction. There was also a large increase in the number of complaints before a Magistrate under this head, and it would seem that the practice of bringing cases of a civil nature before the Criminal Courts has not been stopped yet. Two hundred and five persons were sent up under Chapter VIII of the Criminal Procedure Code, and 161 were ordered to find security for good behaviour. The numbers are less than last year, but the figures show that the police realise the necessity of keeping a constant watch over the criminal population. Offences under the Police Act, and Miscellaneous Offences, show a total of 11,098 against 12,312 in 1898, while the number of prosecutions under the Shipping Act remained the same. The cases under the Port Act show a substantial increase from 784 to 1,173, while prosecutions for cruelty to animals decreased again from 6,636 to 5,668.

8. *Non-cognisable crime in the town.*—There were two important cases of forgery. In one the leaders of the gang mentioned in last year's report were again tried for cheating the Accountant-General, and were convicted. In the other case money was drawn from the Administrator-General, by means of forged documents; this case also ended in conviction and has led to the appointment of a commission to enquire into the working of the Administrator-General's Office. The number of bogus firms in existence at the end of the year was 37 against 42 last year: the steady disappearance of these firms is very satisfactory.

9. *Cognisable crime in the Suburbs.*—In the suburbs, also, there was a slight rise in the number of offences against person and property. There were six cases of coining and three of riot. In two murder cases the accused were both sentenced to death. Grievous hurt cases remained the same, but cases of hurt by a dangerous weapon numbered 36 against 21 in 1898. There were six dacoities, in one of which murder was committed: two cases were sent up for trial, but the accused were acquitted. In the course of the enquiry into these cases a gang of dacoits was arrested with stolen property, and they were convicted at the Alipore Sessions. Another gang of 13 persons was arrested for bad livelihood, and transferred to Hazaribagh, where they were wanted; they were there convicted for dacoity: after these arrests no further cases of dacoity were reported. Burglaries and thefts increased to 84 and 361, respectively. The preventive sections in Chapter VIII of the Criminal Procedure Code were used against 62 persons, of whom 33 were required to furnish security for good behaviour, and six cases were under trial at the close of the year.

10. *Non-cognisable crime.*—The total number of cases for disposal was 7,520, of which 4,522 were under the Calcutta Municipal Act. Two hundred and fifty-two cases were dismissed before trial, but no less than 3,365 cases were abandoned after process had been issued.

11. *Suicides and accidental deaths.*—The number of suicides and accidental deaths remain fairly constant, being 99 and 332 against 89 and 329 in 1898. In spite of the increase in the number of prosecutions for rash driving last year, and a further increase this year, the number of fatal carriage accidents rose from 23 to 32. It is complained that the effect of these prosecutions is nullified by the light sentences which are imposed on conviction and the Lieutenant-Governor hopes that both Stipendiary and Honorary Magistrates will bear this consideration in mind.

12. *Working of the Arms Act.*—The number of firearms held in stock by dealers at the beginning of the year was 3,610. Three thousand two hundred

and sixty-two weapons were imported during the year, and 1,266 were purchased in India. The total number sold was 3,791 against 5,309 in 1898. There was an increase in the number of rifles and guns imported, but a decrease in the number of revolvers and in the amount of gunpowder. There was only one prosecution under the Act during the year, and it was of no importance.

13. *European Vagrancy Act.*—Eighty-five vagrants were admitted to the workhouse during the year, of whom 45 were released on obtaining employment. Six persons were deported after entering into agreements under the Act.

14. *Fire Brigade Act.*—The services of the Brigade were requisitioned at 27 fires during the year against 40 in 1898: the manual engines at out-stations rendered assistance at two fires. Besides these there were 70 other petty fires, entailing an average loss of Rs. 9 each. There was no loss of life, and the estimated total loss of property was Rs. 3,28,820.

15. *Strength and discipline of the police force.*—The total strength of the force, including the police supplied to the Port Commissioners and other public bodies and private individuals, was 3,002 at the beginning of the year. Thirteen members of the force were punished judicially, and 48 men were dismissed against 16 and 59, respectively, in 1898. Two hundred and thirty-nine men were punished departmentally and 251 were fined: the fines were in most cases imposed for absence without leave.

It was mentioned in last year's Resolution that proposals had been submitted to the Government of India for sanction to a considerable increase to the strength of the force. This sanction was received before the end of the year, and at the close of the year the total actual strength of the force was 3,270. The total sanctioned increase is 282 officers and men, of whom 89 will form a new body of armed police, the necessity for which was explained in last year's Resolution.

16. *Old offenders: Anthropometry.*—Six hundred and ninety-six released convicts were under surveillance during the year. Previous convictions were proved against 270 offenders whose antecedents were unknown; 235 by finger impressions, and 35 by roll cards. In all 474 offenders were proved to have been previously convicted against 450 last year.

17. *Judicial work.*—Mr. Pearson was on leave from the 2nd October to the 10th November, and Mr. Bonnaud officiated for him as Chief Presidency Magistrate. The Hon'ble Nawab Bahadur Syud Ameer Hossein, C.I.E., was Magistrate of the Northern Division during the year.

18. *Court of the Chief Presidency Magistrate.*—The total number of cases for disposal during the year was 10,643. In these cases 11,473 persons were concerned, of whom 10,317 were convicted. Five hundred and sixty-eight persons were sentenced to imprisonment, and the sentences exceeded six months in 74 cases. The order of the Court was appealed against in 21 cases; in 20 cases the appeal was dismissed, and in one case the sentence was modified.

19. *Court of the Northern Division Magistrate.*—Sixteen thousand one hundred and fifty-six cases were instituted during the year, in which 17,801 persons were concerned. Of these, 16,980 were convicted and 768 were discharged. Twenty-nine appeals were preferred to the High Court, of which two were successful. In 25 cases the High Court was moved to set aside the Magistrate's orders, and the rule was made absolute in 11 of these. The record of adjournments is satisfactory: in only one instance was a police case adjourned more than five times.

20. *Work of Honorary Magistrates.*—One thousand seven hundred and sixty cases were transferred to the Bench of Honorary Magistrates and 2,760 to Honorary Magistrates sitting singly. Altogether 4,542 cases were dealt with by the Honorary Magistrates against 4,677 last year. Of these, 3,191 resulted in conviction and 760 in discharge or acquittal. Nine appeals were preferred against the decisions of the Honorary Magistrates, but in only one was the conviction set aside. The High Court was moved in eight cases to exercise its powers of review, but none of the motions were successful. The number of municipal cases before the Honorary Magistrates was 28,374, of which 11,091 were struck off. The provisions of the new Calcutta Municipal Bill, relating to the recovery of license fees will greatly lighten the clerical work of

the Honorary Magistrate's Court, and the extra staff at present sanctioned should be no longer required. The Lieutenant-Governor takes the opportunity of acknowledging the great assistance afforded by the Honorary Presidency Magistrates in disposing of this large amount of work, and his thanks are specially due to those gentlemen who, as Mr. Pearson reports, have frequently attended at very short notice out of their regular turn.

21. The thanks of Government are due to Mr. James for the efficient manner in which he has discharged his responsible duties. The favourable mention made of Mr. Paget, the Deputy Commissioner, and of the other officers named in paragraph 38 of the report has been noted by Government.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Police, Calcutta, for information and for communication to the Presidency Magistrates.

Ordered that a copy of the Resolution be forwarded to the Commissioner of the Presidency Division, the Chairman of the Corporation of Calcutta and the Municipal Department of this Government for information.

Ordered also that a copy of the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,  
*Offg. Chief Secy. to the Govt. of Bengal.*

RESOLUTION ON THE REPORT OF THE SANITARY COMMISSIONER,  
BENGAL, FOR THE YEAR 1899.

MUNICIPAL DEPARTMENT—SANITATION.

*Calcutta, the 27th July 1900.*

RESOLUTION—No. 2489S.

READ—

Report of the Sanitary Commissioner, Bengal, for the year 1899.

Read again—

The Report of the Sanitary Commissioner, Bengal, for the year 1898, and the Resolution of Government recorded thereon.

*Vital statistics and rainfall.*—The number of births registered in the Province during the year 1899 was 3,053,178 and the number of deaths 2,218,243 as compared with 2,543,701 births and 1,888,468 deaths in 1898. The ratio of births per mille, calculated on the census figures of 1891 was 42·96, and that of deaths, 31·21. In 1898 the ratios were 35·79 and 26·57, respectively, and the averages of the five years 1894—98 were 35·63 and 31·99. From the mortality figures, as thus shown, the year would appear to have been slightly more healthy than the average, especially when the unrecorded growth of population since the census is taken into account. The Sanitary Commissioner, it is true, on a comparison with the figures of the last decade, pronounces the year to have been an unhealthy one. But in view of the deficiencies in death registration previous to 1892, which were noted by Major Dyson in his report for 1897, as a reason for taking a quinquennial rather than a decennial average as a standard, the unhealthiness of the year, of which an explanation is sought in a badly-distributed rainfall, is not established on a closer inspection of the figures.

The rainfall for the year in Bengal was 73·88 inches, the normal mean being 63·95. During April, May, June, July, and August there was a considerable excess over the normal rainfall. In September it fell short of, and in October it exceeded, the average; in each case to a fractional degree only. The Sanitary Commissioner considers the rainfall as a whole to have been unseasonable, badly distributed, and prejudicial to health; and ascribes the particular unhealthiness of the last quarter of the year to the absence of floods in September and October. Both cause and effect are shown by the tables of averages to be the normal state of things. The difficulties which attend the discussion of this subject have been noticed by Government in commenting on the reports for the two preceding years; and a complete connection between variations in rainfall and mortality has yet to be demonstrated.

2. *Birth rate.*—Whatever opinion may be formed as to the general healthiness of the year 1899, there can be no doubt of the altogether satisfactory condition of the people as regards productiveness. The recorded number of births is by far the largest in the sanitary history of the province, being almost 350,000 above the highest number previously on record.

A large advance on the figures of 1898 was to be expected, considering the exceptional healthiness of that year and the check which was put upon its birth-rate by the influence of the preceding scarcity. But so great an excess over the figures for all preceding years is, after making all reasonable allowance for improvement in registration, striking evidence as to the general prosperity of the province and the good physical condition of its inhabitants.

High as is the birth-rate now recorded for Bengal, it is still below that of the Punjab, North-Western Provinces, and Central Provinces. The Sanitary Commissioner attributes this to the salubrious climate and more nutritious dietary of those provinces, assisted, in the case of the Punjab, by the greater proportion of the more productive Musalman population. Interesting data on this point will doubtless be afforded by the results of the forthcoming census.

Turning to the local divisions of the province, the remarkable feature is the advance of the birth rate in the Patna Division in which the highest figure previously recorded has been very largely exceeded. Hitherto it has been considered that the Divisions which may be expected to show the highest birth rate are those of Dacca, Chittagong, Orissa, and Chota Nagpur; the two former on account of their large proportion of Musalman inhabitants, and the two latter on account of the large number of aboriginal tribes which they contain. Both Dacca and Chittagong, however, although each of them shows a considerable increase on their average figures, have, in the year under review, been exceeded by Patna, where neither of these conditions exist. Apart from this, the very large net increase in the population of Chota Nagpur and its almost stationary condition in the Presidency and Rajshahi Divisions, are noteworthy. The following table gives the comparative figures:—

DIVISIONS.	Population.	Area in square miles.	Average population per square mile.	RATIO PER THOUSAND OF POPULATION.								Ratio of male births to every 100 female births.	Ratio of male deaths to every 100 female deaths.	Excess of births over deaths in 1898.	Average excess of births over deaths in 1898.				
				Births in—			Deaths in—												
				1899.	1898.	Average of past five years, 1894-98.	1899.	1898.	Average of past five years, 1894-98.										
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16				
Burdwan	7,689,189	13,015	592	38·46	33·91	33·10	26·23	23·76	22·78	166	114	12·23	3·52

Bhagalpur	8,582,069	20,809	418	44·47	36·84	36·25	30·26	25·45	31·40	105	117	14·21	4·85						
Orissa	3,877,344	8,172	474	47·16	35·68	36·28	31·26	25·21	29·77	108	107	15·96	6·51						
Chota Nagpur	4,628,793	26,966	171	46·77	33·07	36·07	23·86	19·20	30·17	105	114	22·91	5·90						
Total for the Province	71,060,017	144,408·5	492	42·96	35·79	35·03	31·21	26·57	31·99	105	113	11·75	3·64						

Every district except Rajshahi, Jalpaiguri, and Jessor shows an increase in the birth rate over last year's figures; and all, except Calcutta, are above the previous five yearly average. In Calcutta the sudden drop in 1898, which was noticed in last year's report as being probably due to an exodus of women from fear of plague, has now been almost counterbalanced by a rise from 13·98 to 16·14.

Three districts, Palamu (53·28), Gaya (50·53), and Hazaribagh (50·18) show a birth rate of over 50, and no less than 32 of over 40 per mille.

Among towns the highest birth rates are those of Jamalpur (55·33) and Hajipur (51·75), while the highest birth rate recorded in any rural area is that of Phulbaria in the district of Mymensingh (72·82). No less than 247 out of 560 rural areas returned a birth rate in excess of 45 per mille. This is a very great advance on the figures of the three preceding years, and shows how widely distributed was the increase in the general birth rate for the province.

3. *Seasonal incidence of births and deaths.*—The question of the seasonal incidence of births attracted the notice of Government last year in discussing the after effects of the famine; and the Sanitary Commissioner now gives, with his remarks, a table showing the average monthly birth and death rate since 1892.

From this it appears that the birth rate rises with remarkable regularity from October, and continues high till March; the six intervening months showing a consistently lower birth rate, and the lowest point being reached in June.

The death rate rises in August and continues high till January; thus confirming the conclusion of the Sanitary Commissioner that the birth rate is governed with considerable regularity and certainty by the annual health conditions of the province. The devitalising period appears to commence with the prevalence of the rainy season in July, one month before its effects are disclosed by an increased death rate, and to conclude with the end of the malarious season in January.

In this connection it may be noted that the birth rate during the last five months of 1898, the rise in which was discussed in last year's Report and Resolution with reference to the after effects of the famine, was very considerably higher than the average of ordinary years, thus indicating not merely a

return to normal conditions after famine, but an abnormally healthy period dating from November 1897.

For 1899 the monthly variations are in exact accord with the average.

4. *Death statistics.*—The figures of mortality present no abnormal features. The death rate, while considerably higher than that recorded for 1898, was lower than that of any of the four years which preceded it. The comparatively very low mortality from cholera both in 1898 and 1899 is a satisfactory feature, and contrary to preconceived ideas as to what may be expected to occur in the period subsequent to a famine.

In towns the death rate was 33·10; that for the previous five years being 33·56. By far the highest mortality occurred in Puri (69·18) owing to a severe cholera epidemic in July.

5. *Death rate by age sex and class.*—The death rate among males in 1898 was 33·33 and among females 20·10, the total mortality being 1,180,720 and 1,037,523, respectively. The mortality among females is shown as having increased to a considerably greater extent than that among males. This is a clear indication of improvement in registration, the deficiencies of which in this connection were noted in the Resolution recorded by Government last year.

The figures of mortality according to age are noticeable for the very high proportion as shown in the table below of infant mortality. The fact is familiar.

#### MORTALITY ACCORDING TO AGE.

	IN 1899.		IN 1898.		AVERAGE OF PAST TEN YEARS, 1880—98.		INCREASE OR DECREASE AS COM- PARED WITH 1898.		INCREASE OR DECREASE AS COM- PARED WITH 1880—98.

The mortality among Mahomedans is again shown as considerably higher than that among Hindus, and is now explained by the generally inferior physique of the former and their insanitary habits of life. This is in accordance with the conclusion arrived at at the time of the last census, but has so far not been apparent in the average figures given in the Sanitary Report.

6. *Principal diseases.—Cholera.* The number of deaths recorded from cholera in 1899 was 107,678. This with the exception of the extremely low mortality in 1898 is the lowest on record for the past fourteen years. The disease occurred in epidemic form in Malda, Puri, Bogra, and Cuttack, the most noticeable outbreak being that which occurred at Puri during the *Ruth Jatra* festival in July.

Anti-cholera inoculation was carried on as usual at Purulia, but the number of inoculations performed fell from 10,950 in 1897 and 4,296 in 1898 to 2,388.

7. *Small-pox* was fortunately considerably below the average, 13,116 deaths occurring from this cause, of which over two-thirds were in Orissa. The

backwardness of vaccination in this part of the province, and the correspondingly high death rate from small-pox have been the subject of frequent notice.

8. *Fever* was responsible in the year under report for 1,607,279 deaths, or nearly 73 per cent. of the total mortality of the province. This figure, although higher than that recorded in the very healthy year of 1898, is lower than in any of the four years which preceded it. The highest death rate from this cause was recorded in the district of Malda (41·68), where fever assumed an epidemic form during October and November. It was also extremely prevalent in Dinajpur, Faridpur, Rajshahi, and in certain rural areas of Murshidabad. Apart from the constant causes of malaria, the mortality, where abnormal, is ascribed by the local medical officers and the Sanitary Commissioner to the absence of inundations late in the year. A proposal is made in one instance that, in order to combat malaria, the marshy rice land, which forms the greater part of the Malda district, should be drained and turned into a wheat-growing tract. Such a suggestion is hardly worthy of inclusion in a report submitted to Government.

The attention of Government was recently drawn to the high mortality from fever in the riparian municipalities on the eastern bank of the Hooghly, and the Sanitary Commissioner was asked to obtain and submit to Government a special report on the subject. The report, which is from the pen of Captain Rogers, I.M.S., is a particularly well-reasoned and valuable document. It is the result of a cautious and exhaustive examination of the extent to which malaria, as indicated by the prevalence of enlargement of the spleen, prevails in different parts of the area in question, and of the different operative causes which accompany the variations thus disclosed. As regards the effect of variations in rainfall on the fever rate, the results are negative. Captain Rogers says—

The explanation of the seasonal variations in this tract has not yet been fully elucidated by the present enquiry, and is evidently different from that which I found to prevail on laterite soil in a previous one, in which a high and irregularly-distributed rainfall was always accompanied by a high fever rate and *vice versa*.

A similar conclusion was arrived at by Government in reviewing the Sanitary Report for 1897.

Water-logging does not appear as a particularly prominent factor in producing malaria, though Captain Rogers is careful to add that the data at present available cannot be taken as in any way excluding it as such. Detailed enquiries to be made during and after the present rainy season may be expected to throw light on this point. But the remarkable feature of the report is the very great effect which the provision of a filtered water supply is shown to have in reducing the fever rate in areas which contain every other known factor, including the anopheles mosquito, productive of a high rate of malaria.

Captain Rogers is decisive in giving the provision of a filtered water-supply the preference over a drainage scheme in towns, though he fully admits the importance of the latter. For rural areas, the most malarious of all, he suggests the provision of tube wells, which are cheap, and when sunk near tanks, yield a good and pure supply of water. How far these conclusions are of general application remains to be seen. As regards the particular area to which they apply they may safely be said to have been demonstrated to a practical certainty. That area, however, does not present sufficient local variations to enable them to be laid down as of universal application under varying conditions of soil and climate, and the Lieutenant-Governor would suggest that similar enquiries, for which the present one should serve as a model may be held in two or three typical and varying localities to be selected by the Sanitary Commissioner. Comparison between the results thus obtained would doubtless afford a basis for very valuable conclusions. Meantime the Lieutenant-Governor would again call the particular attention of all local bodies to the importance, which has so constantly been insisted on by Government of the extension and improvement of their water supply to the fullest extent, of which the means at their disposal admit. The Sanitary Board has been directed to prepare a scheme for supplying the areas included in Captain Rogers' enquiry with filtered water.

9. *Dysentery and diarrhoea*.—As in the case of other diseases, deaths from these two causes, while larger in number than in 1898, were considerably fewer than in previous recent years. The total mortality was 41,334, and the incidence was most severe in Calcutta (5·06 per mille) and Howrah (4·40).

10. *Expenditure on Urban Sanitation.*—The following table shows the municipal expenditure on sanitation during the last two years:—

HEADS OF EXPENDITURE.	TOTAL EXPENDITURE		DIFFERENCE.	
	1898-99.	1897-98.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
1. Conservancy, including establishment, road-watering, latrines, &c.	10,61,513	10,58,815	2,728	...
2. Drainage	1,16,768	1,13,456	3,312	...
3. Water-supply	2,01,387	2,62,636	...	61,249
4. Disposal of the dead	7,783	8,883	...	1,100
5. Markets and slaughter-houses	30,980	43,819	...	12,839
6. Treatment of the sick	3,56,926	3,41,492	15,434	...
7. Vaccination	1,609	20,285	...	676
8. Other sanitary works	1,31,063	1,02,038	29,025	...
Total	19,26,059	19,51,624	...	25,565
Construction and maintenance of roads.	4,23,762	4,19,908	3,854	...
Total, including roads	23,49,821	23,71,332	...	21,511

This expenditure represents 44·75 of the total income of the Bengal Municipalities. It is satisfactory to observe that the large rise in expenditure on conservancy which was noticed last year has been more than maintained during 1899. The reduction under the head "water supply" is accounted for by the decrease in the capital outlay on water works in the larger towns. From the special table appended by the Sanitary Commissioner, it appears that municipal expenditure was devoted rather to maintaining and improving the existing sanitary arrangements than to the initiation of original works. The Sanitary Commissioner regrets this, and expresses an opinion that Municipalities should be bound by rule to spend not less than five per cent. of their income on original sanitary works. The Lieutenant Governor is not prepared to adopt the suggestion, and prefers to leave to local bodies the discretion which they at present possess in the matter. It will rest with the Sanitary Commissioner to bring to notice instances of neglect on the part of any particular bodies to make the best use of the means at its disposal. So far as can be judged from the statement appended to the report, the criticisms of the sanitary authorities have as a rule received due consideration, and have been given effect to in cases where financial considerations have permitted. The Sanitary Commissioner does not in the present report point to any specific instance of their being neglected. Serious delinquencies, however, in this respect, were reported in the course of the year, with regard to the Puri Municipality, and orders were passed by Government on the subject.

The most important sanitary improvement effected during the year was the completion of the new waterworks at Berhampore. They are reported to be entirely successful and much appreciated by the inhabitants.

The excellent sanitary work which has been done in Patna has already been noticed by Government in the Municipal Report for 1898-99. Details are given in a note by the Sanitary Engineer appended to the present report.

11. *Precautions against Plague.*—Of the four frontier plague camps at Chausa, Mairwa, Chakradharpur and Khurda Road, the last-named was closed in the beginning of May 1899. The occurrence of local outbreaks of small dimensions but of a virulent character in Faridpur, Dacca, Darbhanga, and Saran, in all of which cases it was proved that the infection was carried by fugitives from Calcutta, rendered it necessary to order the medical inspection of passengers leaving Howrah and Sealdah, and to establish observation camps at Pandua, Bogoola, Bongong, Khulna, Morrelganj, Goalundo, Siliguri, Diamond Harbour, Ulubaria, Kolaghat, Chandbali, and Balasore. These arrangements came into force from the beginning of April. Of the above camps, six, namely, Pandua, Bogoola, Bongong, Morrelganj, Diamond Harbour, and Balasore, were closed on the 15th July, owing to the decline of plague in Calcutta.

At the camps, which were in existence at the close of the year, a total of no less than 1,797,350 persons were examined, of whom 15,651 were detained as presenting suspicious symptoms. Twenty-nine deaths occurred among the detenus, of which eight were due to plague.

12. The Sanitary Board held three meetings during the year, and continued as usual to advise Government and local bodies on the important sanitary projects of the year. Of these, the largest was that for the extension of the Darjeeling water supply, a scheme for which, estimated to cost Rs. 1,84,000, has been adopted by the municipality. The preliminary estimates for the Patna water supply remained under consideration throughout the year. Important improvements in the waterworks of Dacca and Bhagalpur were considered, and advice was given on various local drainage projects which were referred to the Board either by Government or the local authorities concerned.

Experiments on the septic tank principle for the disposal of sewage have been carried out during the year, and the results are said to have so far justified every expectation. The report on this important subject is being held over for the present, pending the application of final tests.

13. *Inspections.*—Major Dyson was on tour for 160 days during the year. Practically the whole of this time was taken up with the organisation and inspection of plague camps. He was only able to inspect 18 municipalities, a very small proportion, which the Lieutenant-Governor hopes will be very largely exceeded in the present year. Arrangements have been made by which the tour programmes of the Sanitary Commissioner and his Deputies shall be prepared in advance and submitted for the approval of Government. The Lieutenant-Governor entirely approves the recommendation of the Inspector-General of Civil Hospitals that the Sanitary Commissioner, or one of his Deputies, shall always be present during the Rath Jatra festival at Puri, as is the rule in the North-Western Provinces in the case of the principal gathering at Hurdwar. Assistant Surgeon Gopal Chunder Mukerji was in charge of the Western Bengal Circle as Deputy Sanitary Commissioner, and spent 168 days on tour. The remaining two circles, owing to the shorthandedness of the Department and the pressure of plague work, had to be left practically without Deputy Sanitary Commissioners during the year.

14. The thanks of the Lieutenant-Governor are due to Major Dyson for his careful supervision of the sanitary administration of the Province in general, and of the precautionary measures against plague in particular.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

*Secretary to the Govt of Bengal.*

RESOLUTION ON THE INLAND EMIGRATION REPORT FOR THE  
YEAR 1899.

## GENERAL DEPARTMENT—EMIGRATION.

RESOLUTION—No. 2476.

*Calcutta, the 31st July 1900.*

## READ—

The Report of the Superintendent of Emigration, Calcutta, on Inland Emigration for the year 1899.

The total number of emigrants despatched to the labour districts in Assam, Cachar, and Sylhet during the year under review was 33,693, all of whom

1893	...	...	41,310	embarked at Goalundo, with the exception of three,
1894	...	...	42,519	who embarked at Dhubri. The notable reduction
1895	...	...	75,430	shown by the marginally-noted figures for Goalundo
1896	...	...	77,566	(omitting the famine year 1897), in the volume of
1898	...	...	48,429	emigration as compared with previous years, was

no doubt due to the agricultural prosperity of the recruiting districts.

2. Of the 33,693 emigrants embarked, 26,175 were destined for Assam, 3,034 for Cachar, and 4,484 for Sylhet. There were 80 casualties during the journey as compared with 109 in the previous year, and 33,615 emigrants, including two infants born on the voyage, were disembarked at their places of destination. Only thirty-one of the casualties on the passage were caused by death, as against 53 in 1898. The decrease in mortality, particularly from cholera, which accounted for only 21 deaths, as against 41 in 1898, and so large a figure as 318 in 1897, is a feature of this year's report. Whilst the year was throughout Bengal singularly free from epidemics, yet the great reduction in the number of deaths testifies to the care taken by the Embarkation Agent at Goalundo to prevent over-crowding and defective sanitary arrangements on board the emigrant steamers. With the co-operation which that officer will receive from the Military Assistant Surgeon who has been appointed during 1899 by the Government of Assam to be the Travelling Inspector of Emigrants on the steamer routes to the labour districts, and the due observance of the new rules regarding the transit of emigrants *en route* to Goalundo, it is hoped that in future years the mortality on that part of the journey will be permanently and substantially lessened.

It is also satisfactory to observe that out of 3,339 batch way-bills, 3,134, or 93·86 per cent., were returned to the Superintendent of Emigration, as compared with 87·52 per cent. in 1898.

3. As in the previous year, coolies were recruited either by (i) Licensed Contractors, (ii) Special Local Agents, (iii) Certificated Garden Sardars, or (iv) as Free Emigrants. There were two contractors with seventeen licensed recruiters working under them during 1899, as compared with three contractors and fourteen recruiters in 1898, twelve special local agents working under section 62 of the Assam Labour and Emigration Act I of 1882, as compared with eleven in 1898, and 108 local agents licensed under section 59 of that Act to supervise the work of the garden sardars as against 144 in 1898. Notwithstanding this noticeable decrease in the latter class of local agents, the number of garden sardars placed under their supervision was 5,325, or 1,136 more than in the previous year, and the average number of sardars under each agent was 49 in 1899 as against 29 in 1898. In the number given for the sardars are included 24 sardarnis, or seven less than in the previous year. If there has been no error in the returns of the local officers, these garden sardars recruited in Bengal, on the average, each 1·15 registered emigrants a year, though apparently a few emigrants who had been registered by special local agents were transmuted by them into garden sardars' recruits before the port of embarkation was reached. Even if every emigrant who left Goalundo had been recruited by this army of 5,325 men, the average obtained by each sardar would have been six only. These figures demonstrate very clearly the great extravagance of the present system by which the tea-gardens obtain their

supply of labour, whilst the District Magistrates of the Chota Nagpur Division complain with reason that their districts are overrun by swarms of licensed and unlicensed recruiters, control over whom it is difficult to retain. It is hoped that even if financial pressure does not compel reform, the impending legislation will effect it.

Of the 33,693 emigrants despatched to the labour districts, 14,698, or about 44 per cent., as in the previous year, were recruited under the free emigration system alone, while 18,995 emigrants were registered under Act I of 1882 by the three other systems of recruitment, viz., 2,057 emigrants by the licensed contractors, 4,091 by the special local agents, while the rest, i.e., 12,847, or 67 per cent., as against 20,180, or 70 per cent. in 1898, of the registered coolies were collected by the garden sardars, many of them from outside Bengal.

4. The original number of emigrants of all classes sent from the recruiting districts of this Province for Goalundo and Dhubri was 29,145, or 4,548 less than the number embarked from those places (the remainder consisting of emigrants recruited in other provinces). Of this original number of recruits, 2,258 were registered by the licensed contractors, 5,850 by the special local agents, 6,278 by the garden sardars, and the remainder, 14,759, were free emigrants. The special local agents' and the garden sardars' coolies, who were registered to proceed to Dhubri, were all, save three, taken first to Goalundo, where they were embarked. There is nothing to show that this decay of Dhubri as a port of original embarkation is to be regretted.

Of the 2,258 emigrants recruited by the contractors, 2,153, or 95 per cent., were registered in the 24-Parganas, and the rest in the districts of Burdwan and Balasore. According to the registers, 33 per cent. of these emigrants were natives of the 24-Parganas, and most of the others came from Ganjam and Orissa. Of the 5,850 coolies registered by the special local agents, Manbhum contributed 3,966, or 67 per cent., Ranchi contributed 1,683, or 28 per cent., and the rest were recruited from the districts of Midnapore and the Sonthal Parganas. The garden sardars obtained the majority of their emigrants from the Chota Nagpur Division, Ranchi having yielded 47 per cent., Manbhum 24 per cent., and Hazaribagh 16 per cent. The rest of their coolies were registered in the districts of Midnapore, Singhbhum, Sonthal Parganas, Gaya, Monghyr, Shahabad, and Cuttack.

5. Between registration or recruitment and embarkation, out of 555 casualties, chiefly caused by discharges and desertions among all classes of emigrants, there were 16 deaths, 12 from cholera and 4 from other causes, as compared with 19 deaths, 14 from cholera and 5 from other causes, in 1898. These numbers are, like the corresponding ones on the river steamers, singularly low, and whilst due in part to the general healthiness of the year, may be explained to some extent by the improved arrangements for rest, feeding, medical treatment, prevention of overcrowding in depôts and railway trains, and segregation of batches infected with cholera and other communicable diseases, made for emigrants *en route* to the labour districts, under the orders and rules issued by Government during the years 1898 and 1899.

6. One of the most important questions connected with inland emigration which occupied the attention of Government during the year under review was the amendment of the Assam Labour and Emigration Act, I of 1882, and the Inland Emigrants' Health Act, I(B.C.) of 1889, with the object of removing defects and abuses connected with emigration. The proposal originated with the Labour Enquiry Commission appointed by the Government of Sir Charles Elliott in 1896. Two Bills, which have since been framed by the Government of India, embodying the suggestions of that Commission and of the Local Governments, came under the consideration of this Government during the year under review. Only one question connected with one of the Bills, viz., the rates of real wages earned by tea-garden coolies, is still under enquiry, and a report on that point will very soon be submitted to the Government of India.

7. An improvement was effected during the year under review in the arrangements for the sleeping accommodation of coolies in depôts and rest-houses. A rule was issued under the Inland Emigration Act, I of 1882, by which

the provision of separate sleeping accommodation in depôts and rest-houses for single women, married couples, and single men was made compulsory. Owners and managers of depôts were also made to provide separate latrines and bathing platforms for the sexes.

8. Other questions of sanitary importance relating to the comfort of the emigrants whilst travelling on the railways engaged the attention of Government during the year under review. Enquiries were made whether the arrangements for latrine accommodation for the sexes, the supply of drinking water, and the isolation of patients attacked with cholera could not be improved. It is hoped that the attention drawn to these details will prevent in future any cause for complaint.

9. The duties of Dr. C. Banks, the Superintendent of Emigration, have been arduous, requiring the constant exercise of much tact and patience; and he discharged them in such a way as to effect valuable improvements with singularly little friction. The Lieutenant-Governor cordially acknowledges the value of his services. There is little doubt that the rules for the regulation of emigration traffic are, owing to steady pressure, and the more sympathetic co-operation of the local Magistrates, becoming really effective, with excellent results. At the same time the willing assistance rendered by some of the large firms engaged in the forwarding of emigrants, and especially by Messrs. Logan and Leslie, has greatly contributed to the progress already made, and entitle them to the thanks of the Government.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACKE,  
*Secretary to the Govt. of Bengal.*

**RESOLUTION ON THE FINAL REPORT ON THE SURVEY AND SETTLEMENT OF THE TIKARI WARDS AND A FEW GOVERNMENT ESTATES IN THE DISTRICT OF GAYA.**

REVENUE DEPARTMENT—LAND REVENUE.

*Calcutta, the 30th July 1900.*

RESOLUTION—No. 2730.

**READ—**

The final report on the survey and settlement of the Tikari Ward's Estate, the Government Estates, and the Belkhara Mahal in the district of Gaya.

**READ also—**

Letter No. 1303S, dated 13th July 1899, from the Director of the Department of Land Records and Agriculture, Bengal, to the Board of Revenue, Lower Provinces, and Board's letter No. 1145, dated 13th November 1899, to the Bengal Government, submitting the above report with their respective remarks.

THE question of undertaking a survey and record-of-rights of the Tikari Ward's Estate engaged the attention of Government Objections raised against the from the time of Sir Rivers Thompson, the late settlement operations. Lieutenant-Governor of Bengal; but the proposal was always strongly opposed by the local officers and the members of the Board of Revenue, in their capacity as the Court of Wards, who held that it was not required for the good of the property, and that the proprietor, if not disqualified, would not have undertaken it. The operations were, however, rendered inevitable by the terms of Government Resolution No. 1470L.R., dated the 12th April 1892, which prohibited the issue of certificates for the realisation of rent and cesses in those wards' estates which had not been surveyed and settled under Chapter X of the Bengal Tenancy Act. The operations were accordingly initiated by the issue of Government Notification No. 1782L.R., dated the 10th April 1893, under the Bengal Survey Act of 1875, which was subsequently modified by the issue of another notification, No. 1082L.R., dated the 25th February 1895, under section 101(2)(c) of the Bengal Tenancy Act restricting the operations to villages in which the Tikari Raj had a 16-anna interest, or an interest to the extent of 8 annas or more. The survey and settlement of the Government estates were undertaken with a view to remove certain gross irregularities discovered in the proceedings of the previous settlement which had been conducted by the khas-mahal Deputy Collector of Gaya; but, in this instance, the necessary notification was issued under section 101(2)(d) of the Act. The Belkhara Mahal, in which Government is proprietor of a 6-anna share, and the Tikari Estate the permanent lease-holders of another 6-anna share, was brought under survey and settlement by Government Notification No. 2029L.R., dated the 15th April 1895, issued under section 101(2)(a) of the Act. These three estates include properties in every part of the district of Gaya, and in their diverse stages of development and physical conditions are adequately representative of the district. Only in the fact that they do not embrace the properties of small proprietors do they fail to afford results of typical value.

2. Whatever might be said of its paper and cloth industries and brass ware manufactures of the past, Gaya of the present time, may, for all practical purposes, be regarded as a purely agricultural district, the prosperity of which is dependent on artificial irrigation to an extent unequalled elsewhere in Bengal. The general slope of the country and the nature of the soil render the land very unretentive of moisture, so that the local rainfall plays a comparatively unimportant part in the agricultural industry of the district. The soil of the district is sometimes sand, sometimes clay, and the fertility of the land is dependent, after irrigation, on the preponderance of the latter constituent.

Of the different methods of artificial irrigation adopted in the district, the more important are—

- (1) irrigation by canal water;
- (2) *genrabandi* or irrigation of the catchment area by retention of the rain;
- (3) irrigation by river water, often retained in tanks;
- (4) well irrigation.

The Sone Canal is the great source of canal irrigation, and its construction has fertilised the western portion of the district. The *genrabandi* system is better suited to the cultivation of autumn and spring crops than to winter-rice. Well irrigation is resorted to in all parts of the district, but is particularly adapted to the cultivation of poppy and cold-weather crops. The most important of all is the irrigation from river water stored in *ahars* and conveyed by *pains*, and the agricultural prosperity of the country depends almost entirely on it. It requires a good deal of outlay both for construction and maintenance, for which the raiyat is as a rule entirely dependent on his landlord. This is the origin of and justification for the well-known *bhaoli* system of land tenure which is so widely prevalent in Gaya. It is locally recognized that a landlord should spend annually a twelfth of his collections on the upkeep of this irrigation, and generally speaking the expenditure gives a very handsome return.

It is understood from the present report that the irrigation provided in the Government estates in pargana Bhelawar is capable of much improvement, and that the bed of the Morhar River needs clearing. If these matters have not already engaged the attention of the Board, it is desired that this may now be looked to.

3. It appears that about 70 per cent. of the cultivating lands in this district are held on *bhaoli* rents, which are collected in four different ways, but the two most important are known as *kankut* and *batai*. Under the former method the land on which the crop is standing is measured and the outturn estimated; under the latter the harvest is reaped and divided on the threshing floor. Most landlords take  $22\frac{1}{2}$  seers per maund of produce, while Government takes  $21\frac{1}{2}$  seers and the Tikari Estate 18 seers. Produce rents are not confined to Gaya, and their economic expediency is not a novel subject of discussion. The abstract merits and demerits of the system are well known, but, in the concrete case of this district, the Lieutenant-Governor endorses the following opinion of the Settlement Officer:—

To sum up the case, then, I think it can be fairly said that any advantages the *bhaoli* system possesses are due to the agricultural conditions which necessity imposes on this part of the country, and that Dr. Grierson's undue admiration of the system has led him into under-estimating the extent to which the system as a system engenders slovenly cultivation and the vast amount of peculation that actually goes on under the complicated method of rent recovery that it necessitates. It is not necessary to discuss how far the *bhaoli* system is suited to Gaya. It is a question of necessity, not of suitability. It is my firm belief that without it at least one-fourth of Gaya would go out of cultivation within a few years.

4. Proposals for the commutation of the *bhaoli* into money rent have been made from time to time since the beginning of the operations. As early as July 1893, Sir Antony MacDonnell, who was then Officiating Lieutenant-Governor of Bengal, ordered that the conversion of the *bhaoli* into *nakdi* rents should be effected on a large scale in the Tikari Ward's Estate for the benefit of its tenantry. The policy was, however, strongly deprecated by the Collector and Commissioner, whereupon Sir Charles Elliott ordered that no steps should be taken in that direction against the will of the tenants. The question was, therefore, finally set at rest, so far as the Tikari Estate was concerned, in which 72·8 per cent. of the net cropped area is still held on *bhaoli* rent. It was revived in 1896 by Mr. Savage, Collector of Gaya, in connection with the settlement of the Government Estates, on the general ground that the management of estates paying cash rents is more effective, and the opportunities for fraud

on the part of the subordinate officials much fewer than in estates paying produce rents. For the purposes of the present settlement the proposals of Mr. Savage were adopted; and the rate for commutation was obtained by dividing the average yearly collection from the *bhaoli* lands for a period of five consecutive years preceding the settlement operations by the largest *bhaoli* area cultivated in any year during that period. Applying this rate, the *bhaoli* rent of 961 holdings in 40 villages was commuted and assessed at Rs. 10,651. The settlement officer has shown good grounds for his opinion that the substitution of cash rents has been steadily progressing since the beginning of the century, and that it is still going on as, for instance, in the Belkhara Mahal, where Mr. Solano, the Manager of the estate, has introduced the system of cash payment in all villages irrigated by the Sone Canal. He has also urged many reasons why the natural process should not be expressly accelerated by outside interference. The Lieutenant-Governor, therefore, thinks that the system should be left alone for the present; and he accepts the opinion expressed by the Board that no further steps should be taken towards commutation in the case of any lands dependent on irrigation works which are not of a permanent nature like the Sone Canal. In the event of a proposal, for which very strong reasons will be necessary, being made to sell or otherwise transfer any of those Government estates in which produce rents have been commuted, the warning given by the Settlement Officer of the dangers to which the *raiyats* will be exposed, from the absence of any incentive to a purchaser to keep up the irrigation works, must be carefully remembered.

In the Tikari Raj the Manager need not, in the absence of exceptional reasons to the contrary, make any change for the present except in those villages which, being irrigated from the Sone Canal, enjoy a reasonable certainty regarding the future of their water-supply.

5. The *thikadari* system is another important feature of the system of land tenure prevalent in Gaya, and owes its origin to the large number of *bhaoli* tenures and the constant

and detailed supervision on the part of the landlord, which the tenure entails. This he is unable to give himself, and he prefers the certain income from the *thikadar* to the fluctuating one dependent on the peculations of unchecked servants. The system is not used in the Government Estates; is being gradually abolished in the Tikari Raj Estates; and the lessee of the Belkhara Mahal manages direct. It possesses, therefore, a somewhat academic interest in the Gaya settlement report, and its discussion will be with propriety reserved to the more general aspect it offers in the North Ganges districts.

6. The operations were commenced first in the Tikari Estate in 1893, thence extended to the Government estates in 1894, and finally to the Belkhara Mahal in 1895.

They were practically wound up in all the three areas in the course of 1897, some small amount of report-writing and completion of records remaining to be dealt with in 1898. The following table shows the total area and the number of villages and holdings dealt with in each of the three sets of properties referred to :—

		No. of villages.	Area in sq. miles.	No. of holdings.
Tikari Estate	...	551	388·74	48,174
Government Estates	...	118	101·99	6,699
Belkhara Mahal	...	89	91·15	10,945
		—	—	—
Total	...	758	581·88	65,818
		—	—	—

The survey proceedings were conducted under the supervision, first, of Captain Hodgson and then of Captain Crichton, Mr. Berkeley and Mr. G. T.

Hall being in subordinate charge of the traverse and cadastral sections respectively. The control of the settlement proceedings was, in April 1894, placed in the hands of Mr. P. C. Lyon, in addition to his duties as the Settlement Officer of Muzaffarpur. On his transfer in February 1896, it was entrusted to Mr. C. J. Stevenson-Moore who held it until the final close of the operations in 1898. Under Mr. Lyon the subordinate charge of the proceedings was in the hands of Mr. C. E. Warburton, formerly of the Bombay Survey Department, but he was replaced in November 1894 by Babu Annada Charan Gupta, who remained in charge until the conclusion of the settlement.

7. The traverse survey was made of the whole area brought under the operations, with the exception of only 24 villages in the Tikari Estate and the villages in the Belkhara Mahal, situated on the west of the river Punpun, which had been previously cadastrally surveyed in connection with the irrigation survey of 1876-77. The cost of the work has not been separately shown, but the distribution of the villages was not conducive to cheapness. The work was also done rapidly in order to provide material for the cadastral parties, which according to the arrangements, followed somewhat too quickly on the traverse parties. The result was that it was done more perfunctorily and less accurately than it otherwise would have been. The cadastral survey did not embrace that portion of the Tikari Raj (comprising 224 villages) which is let in permanent lease, in which the external village boundaries only were mapped; and the existing cadastral survey records of the area west of the Punpun, of which a survey had been made for irrigation purposes, were merely revised.

8. An attempt was made to utilise the local patwaris as survey and *khana-puri* amins, but, as in North Bihar, it was unsuccessful. Various other difficulties, inseparable from the experimental stage of such an undertaking as the preparation of a record-of-rights, though they delayed work, were successfully overcome. The raiyats were apathetic, and the Manager of the Tikari Raj out of sympathy with the objects of the proceedings; whilst considerable delay was caused by the agents of the lessee of the Belkhara Mahal. Under these circumstances, the Lieutenant-Governor considers that the degree of success obtained was not unsatisfactory.

9. The attestation of the records extended over the cold weathers of 1894-95, 1895-96, and 1896-97, the total numbers of tenancies attested being 65,818 contained in 660,026 plots. It was at this stage of the settlement proceedings that entries of rent and the raiyats' status were made in the *purchas* and *khatians*. The present report contains very careful definitions of the nature of the various kinds of tenant-right existing in Gaya, which are not the least interesting or valuable portions of the work. The fixing of their exact meaning was naturally only completed at a late stage in the proceedings inasmuch as one of the main objects of the record-of-rights is the ascertainment of the nature of the rights to be recorded, and the previous uncertainty to some extent delayed the work. Of the many grave questions that arose in the course of the proceedings, one of great local importance was the recognition of *abwabs*, regarding which it was decided that such as were in reality a part of the rent, and admitted to be such by the tenants, should in spite of the name, be recorded as rent. It is perhaps unfortunate that a similar regard to the origin and history of these dues did not determine the decision by the Civil Court of the same question as it arose between the Tikari Raj and its *thikudars*. Another matter of great general importance is stated in the following extract from the Settlement Officer's report:—

The main difficulty met with was one involving a legal principle. Occupancy right to the extent of 1,700 bighas had been purchased at auction sale by Mr. Solano. Under section 22, clause (2) of the Tenancy Act, when the occupancy right is land is transferred to a person jointly interested in the land as proprietor or permanent tenure-holder, it shall cease to exist. Accordingly Mr. Solano was not entitled to be entered as occupancy raiyat. But the High Court in the Full Bench Decision Jawadul Haq *versus* Ram Das Saha, published in page 143, Vol. XXIV of the Indian Law Reports, Calcutta, has held that there is no law that prevents one co-proprietor holding the status of a tenant under other co-proprietors, and that, on the purchase of an occupancy holding by a co-proprietor, the

occupancy right but not the holding ceases to exist. Thus the transferee, although a proprietor or a permanent tenure-holder, is entitled to be entered as a tenant for the holding shorn of the right of occupancy, or in other words, he is a non-occupancy raiyat. It is apparently, therefore, within his power to acquire the right of occupancy after twelve years' continuous possession. The question was referred to the Advocate-General. His opinion was communicated with Director's letter No. 183T.S., dated the 25th May 1897, and in accordance with it, Mr Solano was recorded as a non-occupancy raiyat, but the length of the period for which he has been holding as such was purposely omitted. In my opinion this, if an accepted principle of tenant law in Bengal, not only will operate very hardly on the actual cultivator of the soil and on the weaker co-proprietors, but is utterly inconsistent with that policy which Government, in legislating on the rights of landlord and tenant, has steadily pursued, at least since 1859, that policy of first seeking out actual facts as evolved by custom, and then of protecting and nurturing the good growth and weeding out the bad. The wholesale purchase of occupancy right by a landlord to the exclusion of cultivators may have the sanction of custom, but it is not the custom found to prevail on the estates of good zamindars, and nothing can be said in its favour. The actual cultivator becomes an under-raiyat, rack-rented and liable to be ejected summarily without notice. The other proprietors, if the purchaser refuses to pay them rent, are without legal remedy; because under section 188, Bengal Tenancy Act, unless all the proprietors join as plaintiffs, no legal action can be taken. The other proprietors, therefore, cannot get a rent fixed in the holding and would have difficulty in recovering any rent that had been fixed. Their only remedy is a partition, and that door has been closed against most proprietors by the new Partition Act.

The Lieutenant-Governor agrees with the Board that this question is of great importance; and the case will be restated for the opinion of the present Advocate-General.

10. The applications for enhancement of rent in the Tikari and Belkhara Estates were few in number, and were based on the ground of cultivation in excess of the nominal area of the holding. In the Government estates the assessment was of more importance. The settlement of these villages was conducted under the provision of section 101 (2) (d), coupled with section 104(2) of the Bengal Tenancy Act, and the Settlement Officer was bound to fix a fair rent in the case of every tenant. The following general principles were laid down for the assessment of these estates:—

- (1) An increase to be taken on excess area at the existing rate of rent of the holding; an allowance of 2 cottahs per bigha to be given to cover differences in the systems of measurement.
- (2) A reduction to be given on decreased area, but without any allowance, and only where the existing rent is not so low as to justify the supposition that the area on the rent-roll is fictitious, and that the existing rent cannot have been regulated with reference to it.
- (3) In certain estates all rents to be enhanced by two annas in the rupee owing to a rise in prices, unless the Collector agrees to compromise for less.
- (4) In certain estates no increase of any kind to be taken.
- (5) No alteration of less than two annas to be considered, but all rents to be altered so as to get rid of fractions of annas from the rent-roll.

The results of the proceedings are abstracted by the Settlement Officer as follows:—

The assessment affected 103 villages out of 118 and 3,280 holdings with a total existing rental of Rs. 52,040. Under section 52 the rents of 883 raiyats were enhanced by 2·4 per cent on account of increased area, and under section 52(b) the rents of 729 tenants were reduced by 1·4 per cent. for the reverse reason. As was anticipated by the Collector, therefore, not much benefit to the rent-roll accrued owing to the proceedings under this section; but on account of a rise in prices the rents of 2,382 tenants were enhanced by 7·9 per cent. The total result was that the rent-roll of Rs. 52,040 was raised to Rs. 56,763, or by 9·33 per cent. The rents of only 461 tenants were retained as fair; 3,254 tenants compromised; none contested; 26 only absented themselves and their rents were fixed *ex parte*.

11. Only in 15 villages were fair rents not settled, and these were situated in the two most unfertile parganas of Jarra and Sherghati. The simultaneous conversion of *bhaoli* into *nakdi* rents renders a comparison of the new with the old rents a work of some difficulty, though it is clear that the enhancements have been very low compared with the increased area under cultivation. In

the *nakdi* villages the increase in the cultivated area has been 18 per cent; but it is impossible from the report to determine the increase for the whole of the Government Estates. Similarly, the statements appended to the report do not determine the increase in the rent now payable even for the *nakdi* villages as a whole, owing to the inclusion of *sairats*. The Lieutenant-Governor considers that the uncertainty on this point is the only blemish in an otherwise admirable report; and until that uncertainty is removed he is not prepared to sanction the assessment proposed. The Board are requested to submit to Government such statements as will make explicit the effect of the proposed assessment on the present demands from the Estates compared with the collections of previous years. In the particular case of the eight villages included in the Nawada group [III (a) of statement D] further local enquiry appears to be needed.

12. The Settlement Officer has discussed the value of the present record-of-rights to the raiyat and to the zamindar. To the former it has given a practically unimpeachable proof of the existence and the incidents of his valuable cash rent land, and it has removed the popular impression that he could not acquire occupancy rights in his *bhaoli* lands. To the latter it has given that exact knowledge without which it is impossible for a great zamindar to control his servants. How necessary that exact knowledge was may be surmised in part from the fact that the survey proceedings were delayed because it was sometimes very difficult to find out the site of villages belonging to the Tikari Raj, and in other cases villages which were not the property of the Raj were surveyed under the mistaken belief that they formed part of the Estate. To the administration of the district of Gaya, the Lieutenant-Governor agrees with the Director of Land Records, the reports will prove of the greatest value in all its branches.

13. The following table compares the relative agricultural conditions of the three estates:—

Name of estate.	Area in acres.	Percentage of the net cropped area to the total area.	Percentage of the twice cropped area to the net cropped area.	Percentage of area under <i>bhadoi</i> to the net cropped area.	Percentage of the area under <i>aghani</i> to the net cropped area.	Percentage of the area under <i>rabi</i> to the net cropped area.	Percentage of portion irrigated to net cropped area.
1	2	3	4	5	6	7	8
Tikari Ward's Estate	218,795	69·6	18·7	4·3	52·8	16·6	44·2
Government Estates	65,273	40·4	19·4	15·0	52·0	52·4	48·5
Belkhara Estate ...	58,388	80·6	32·6	8·2	61·4	63·0	63·2
Total ...	372,456	68·3	21·8	6·1	54·4	61·3	48

The above figures clearly indicate that the Belkhara Mahal is in the best stage of agricultural development, while in the Tikari and Government Estates, there appears to be considerable scope for further improvement.

The irrigation from *ahars* and channels is 55, 62, and 53 per cent., in the respective estates, that from wells being 12, 14, and 15 per cent. In the Tikari and Belkhara Estates each well has to irrigate over six acres; but in the Government Estates 4 acres only per well is the average. It further appears from the stock statement that there is one plough bullock to every 4·4 acres, and one plough to every 13·4 acres. With regard to the crops grown, the comparative insignificance of the autumn harvest is very noteworthy. The spring crops too consist mainly of *khesari* and gram, which are sown, the former always, the latter frequently, in the rice fields. The areas under poppy and sugar are much the same, being 2·3 and 2·2 per cent.

14. The following table compares the numbers and areas of tenancies of each kind and the rates of cash rent paid by each class of tenants in the three estates:—

NAME OF THE ESTATE.	ZIRAT (PROPRIETOR'S PRIVATE LAND).		IN DIRECT POSSESSION OF PROPRIETORS, MALIKS, AND TENURE-HOLDERS.		RAIYATS AT FIXED RATES.		SETTLED RAIYATS.	
	Number of holdings.	Area.	Number of holdings.	Area.	Number of holdings.	Area.	Number of holdings.	Area.
1	2	3	4	5	6	7	8	9
Tikari Ward's Estate ...	155	A. D. 476 48	530	A. D. 3,992 76	2,491	A. D. 3,023 75	40,166	A. D. 166,528 71
Government Estates ...	...	...	81	A. D. 310 66	22	A. D. 157 61	5,330	A. D. 24,102 41
Belkhara Estate ...	...	...	518	A. D. 1,542 48	23	A. D. 94 20	8,497	A. D. 42,914 31

NAME OF THE ESTATE.	NON-OCCUPANCY RAIYATS.		RENT-FREE HOLDERS.		AVERAGE SIZE OF A HOLDING		AVERAGE OF CASH RENT PER ACRE PAID BY—			
	Number of holdings.	Area.	Number of holdings.	Area.	Occupancy holding. Non-occupancy holding.	Kent-free holding.	Raiyat at fixed rates.	Occupancy raiyats.	Non-occupancy raiyats.	
	10	11	12	13	14	15	16	17	18	19
Tikari Ward's Estate ...	1,616	A. D. 5,073 22	3,276	A. D. 4,274 62	A. D. 3'1	A. D. 1'3	Rs. A. P. 4 9 0	Rs. A. P. 4 6 0	Rs. A. P. 2 8 0	
Government Estates ...	813	A. D. 3,094 58	483	A. D. 606 21	A. D. 4'3	A. D. 3'8	A. D. 1 12 0	A. D. 3 8 0	A. D. 1 10 0	
Belkhara Estate ...	666	A. D. 2,720 94	816	A. D. 1,280 46	A. D. 5'0	A. D. 4'0	A. D. 1'5	A. D. 1 9 0	A. D. 5 14 0	

The rate payable by occupancy raiyats is Rs. 3-8 in Government estates, Rs. 4-6 in Tikari, and Rs. 5-14 in Belkhara. The variation is in proportion to the relative productiveness of the three estates. The rates are high, but (except in the Belkhara Mahal) they are paid on the most fertile lands only, to which the raiyat devotes special attention. The rates paid by non-occupancy raiyats are suggestive of the stage of agricultural development attained in the district. It is to be noted that the average size of the holdings is not the same thing as the average amount of land in the possession of a family.

Cost of the operations. 15. The following table gives the cost of the operations in a convenient form:—

NAME OF ESTATE.	Cost of survey.	Rate per acre.	Cost of settlement.	Rate per acre.	Total cost.	Rate.	Deductions.	Net cost.	Net rate per acre.
1	2	3	4	5	6	7	8	9	10
Tikari Ward's Estate ...	Rs. 1,20,091	A. P. 7 10	Rs. 51,423	A. P. 3 4	Rs. 1,72,413	A. P. 11 2	Rs. 1,834	Rs. 1,70,579	A. P. 10 11
Government Estates ...	22,400	A. P. 5 6	16,627	A. P. 4 0	39,027	A. P. 9 6	.....	30,027	A. P. 9 6
Belkhara Mahal ...	14,507	A. P. 4 0	24,655	A. P. 6 9	39,232	A. P. 10 9	2,592	36,640	A. P. 10 6
Total ...	1,57,988	A. P. 6 9	92,714	A. P. 4 0	2,50,072	A. P. 10 9	4,426	2,46,246	A. P. 10 8

The cost of the operations has been borne by the Raj in the Tikari estates, except as regards the rent-free tenures, the holders of which are paying half. Government has borne the costs in the Government estates. The

question as regards the Belkhara Mahals has not yet been decided. It cannot be said that these operations have paid here from a commercial point of view, but until they were carried out, no intelligent management of these estates was possible.

16. The Lieutenant-Governor desires to be favoured by the Board with their opinion on the question of the maintenance of Maintenance of the records. land records in the three estates, and with definite proposals where the Board considers that such are desirable.

17. In conclusion, the Lieutenant-Governor desires to thank Captain Crichton, Superintendent of Settlement-Surveys, Conclusion. Bengal, Mr. P. C. Lyon, who held charge as Settlement Officer at the earlier stage of the operations, and Messrs. D. J. Macpherson, C.I.E., and H. Savage, late Collectors of Gaya, who helped in bringing these operations to a successful conclusion. He also notices with pleasure the commendation by the Board of Mr. G. T. Hall, Assistant Superintendent of Survey, on Babu Annada Charan Gupta, the Assistant Settlement Officer, and on other officers who held subordinate charge of the operations. The settlement operations were concluded by Mr. Stevenson-Moore, who has submitted a final report of great interest, and, with the companion report on the condition of the small agriculturists and labourers, of high value. The Lieutenant-Governor agrees with the opinion of the Director of the Department of Land Records, that these two reports will be landmarks in the history of Gaya.

ORDER.—Ordered that the Resolution be published in the *Calcutta Gazette* and a copy of it be forwarded to the Board of Revenue, Lower Provinces.

By order of the Lieutenant-Governor of Bengal,  
F. A. SLACKE,  
*Secretary to the Govt. of Bengal.*

DISTRICT ROAD FUND.

No. 3275R.C.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

ROAD CESS.

*Dated Calcutta, the 30th July 1900.*

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 173L.F., dated the 23rd July 1900, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 31st March 1900.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the fourth quarter of the year 1899-1900 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded for information to the Commissioners of the Rajshahi, Chittagong, Bhagalpur, and Chota Nagpur Divisions; Superintending Engineer of the Northern Circle; Inspectors of Works, Eastern and Western Circles; and Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,  
D. B. HORN,  
*Offg. Secretary to the Government of Bengal.*

J. C. E. BRANSON,

Accountant-General, Bengal.

**WORKING OF THE FIRE BRIGADE IN THE TOWN AND SUBURBS OF CALCUTTA AND IN THE MUNICIPALITY OF HOWRAH FOR THE YEAR 1899-1900.**

NOTIFICATION.

*No. 2507 M.—The 25th July 1900.*—The following is published for general information.

E. N. BAKER,  
*Secy. to the Govt. of Bengal.*

No. 8234., dated Calcutta, the 16th July 1900.

From—A. H. JAMES, Esq., Commissioner of Police, Calcutta,

To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit, in accordance with section 41, Act I of 1893, my Report on the working of the Fire Brigade in the Town and Suburbs of Calcutta and in Howrah during the year 1899-1900.

2. The force at the end of the year under review was as follows:—

<i>Lal Bazar.</i>	<i>Howrah.</i>	<i>Chitpore.</i>
Superintendent ... 1	Engineer ... 1	Engineer ... 1
Chief Engineer ... 1	Fireman ... 1	Driver ... 1
Assistant Engineers ... 2	Tindals ... 5	Fireman ... 1
European driver ... 1	Driver ... 1	Tindales ... 2
Native drivers ... 2	Khalasies ... 8	Khalasis ... 12
Fireman ... 1	Syces ... 3	Syces ... 3

—	—	—

A comparison with the strength of the last year's force will show the addition of one native driver to the Lal Bazar Contingent. Provision was made for this addition in the budget for 1899-1900, and the sanction of Government was obtained (*vide* Government Order No. 4753M., dated 23rd September 1899). A detailed statement showing the receipts and expenditure of the Fire Brigade will be found as an appendix to this report. The year opened with an actual balance of Rs. 889-13-1. The receipts amounted to Rs. 80,736, including Rs. 7,587-8 which were due in 1898-99, but were actually received during the year under report. The total expenditure during the year amounted to Rs. 72,099-8 4, leaving a balance of Rs. 9,526-4-9 at the close of the year.

3. During the year under review, 26 fires occurred, in each of which the value of the property destroyed was Rs. 50 or more. At 23 of these the Brigades were in attendance. Two were extinguished by the residents of the locality with the help of the local police, and one was extinguished by the Port Fire Engine with the assistance of the Calcutta Fire Brigade. Three of these fires occurred outside the jurisdiction of the Calcutta Fire Brigade, but were, however, extinguished by them.

4. In addition to the fires noted in paragraph 3, there were 62 petty fires, 25 in the Town, 31 in the Suburbs and 6 in Howrah. The Brigade attended 7 of these; the rest were extinguished by the residents of the locality. The value of the property destroyed in these fires amounted to Rs. 438-7, making an average loss of Rs. 7-1-1 per fire.

5. The total estimated value of all properties destroyed by fire during the year under review was Rs. 3,97,738-7 (inclusive of Rs. 2,500 destroyed in the three fires which occurred outside the jurisdiction of the Calcutta Fire Brigade) against Rs. 4,49,579, the value of properties destroyed in 1898-99.

6. A girl died from the effects of injuries received at a fire on 3rd March. There was no other loss of life from fire during the year concerned.

7. There were three fires in buildings licensed under Act I of 1893 and Act I of 1894, in which property to the total of Rs. 45,180 was destroyed.

8. Four fires during the year 1899-1900 demand special notice—

(a) On 15th January a fire broke out on board S.S. *Falkland*, which was lying off the Hastings Moorings with a cargo of jute and hides. The fire was a very obstinate one, and was not thoroughly extinguished for a week. Property to the value of Rs. 1,50,000 was destroyed.

(b) On 3rd March a fire broke out in Taltollah Lane. Eighteen tiled huts were demolished by it, and a pucca house was also damaged. A man and a girl received injuries from this fire, and both were taken to the hospital. The man recovered, but the injuries proved fatal to the girl. The fire lasted 4 hours and 15 minutes, during which time Rs. 12,000 worth of property was destroyed.

(c) On 15th May a large five-storied pucca building and a one-storied pucca godown in Canal East Road caught on fire. In the larger building there was some machinery and a large store of wheat and flour. The smaller building contained a store of flour only. The fire lasted 30 hours and 45 minutes, during which time Rs. 1,69,300 worth of damage was done.

(d) On 18th January a fire broke out at the Union Jute Press and demolished a tiled shed about 100 feet by 50 feet. The shed contained bales of jute. The fire was finally extinguished in 7 days 2 hours and 15 minutes. The damage done was valued at Rs. 40,000.

9. During the year under review five prosecutions were instituted under Act IV of 1884, Indian Explosives Act. All the cases resulted in the conviction of the accused, who were accordingly fined.

10. A memorandum of the fires that occurred is attached as a further appendix in addition to the statement showing receipts and expenditure on behalf of the Fire Brigade.

*Memorandum of fires in the Town and Suburbs of Calcutta and in Howrah from 1st April 1899 to 31st March 1900.*

No.	Date.	Locality with section letter.	Duration of fire.	Approximate value of property destroyed.	Remarks showing nature of damage done, &c.
1	2	3	4	5	6
1899.					
1	4th November ...	Ramkristopur Ghat, 3rd Division, Port Police.	1 hour ... ...	50 0	Some raw in a boat; not insured.

CALCUTTA,  
The 16th July 1900.

A. H. JAMES,  
Commissioner of Police.

## WEATHER AND CROP REPORT.

*For the week ending the 30th July, 1900.*

**Burdwan.**—Rainfall at Sadar 3·50, Kalna 4·41, Katwa 3·20, Raniganj 2·83. Transplantation of *aus* and *aman* going on. More rain wanted. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	13
Kalna	12 $\frac{1}{6}$
Katwa	12 $\frac{1}{8}$
Raniganj	10 $\frac{1}{2}$
	$\left. \begin{array}{l} 12\frac{1}{6} \\ 12\frac{1}{8} \\ 10\frac{1}{2} \end{array} \right\}$ per rupee.

**Birbhum.**—Rainfall at Sadar 2·15, Rampur Hât 2·64. Weather hot and cloudy. More rain wanted. Paddy transplantation continues. Sugarcane progressing. Price of rice at Sadar 11 $\frac{1}{2}$  seers and at Rampur Hât 12 seers per rupee. Fodder sufficient.

**Bankura.**—Rainfall at Bankura 1·30, Vishnupur 2·33. Weather variable. Rain urgently needed. Transplantation very backward except on low lands in places. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura 11 seers and at Vishnupur 10 seers 10 chitaks per rupee.

**Midnapore.**—Rainfall at Sadar 5·18, Contai 1·27, Tamluk 0·56, Ghatal 1·51. Weather hot. Transplantation retarded for want of sufficient rainfall. Sugarcane doing well. Paddy seedlings are being destroyed by insects at Midnapore and Pingla. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	12
Contai	14
Tamluk	11 $\frac{3}{8}$
Ghatal	12
	$\left. \begin{array}{l} 14 \\ 11\frac{3}{8} \\ 12 \end{array} \right\}$ per rupee.

**Hooghly.**—Rainfall at Sadar 0·42, Serampore 2·33, Arambagh 3·27. Sowing of *aman* going on. Condition of jute, *aus* and sugarcane good. More rain wanted. Common rice sells at 11 seers 10 chitaks per rupee.

**Howrah.**—Rainfall at Sadar 0·57, Ulubaria 1·60. Weather hot. More rain wanted for transplantation of winter paddy. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

**24-Parganas.**—Rainfall at Sadar 0·18, Basirhat 2·72, Diamond Harbour 0·24. Weather hot and cloudy. Transplantation of *aman* going on except in the Barasat subdivision. More rain is badly wanted. Cattle-disease reported from some parts of the Sadar and Basirhat subdivisions. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	13
Barasat	12
Basirhat	14
Diamond Harbour	11 $\frac{1}{2}$
	$\left. \begin{array}{l} 12 \\ 14 \\ 11\frac{1}{2} \end{array} \right\}$ per rupee.

**Nadia.**—Rainfall at Sadar 2·97, Kushtia 1·57, Meherpur 2·44, Chuadanga 2·83, Rana-ghat 1·73. Weather hot and cloudy. Prospects of standing crops good. But more rain urgently wanted. Fodder and water sufficient. Price of common rice stationary.

**Murshidabad.**—Rainfall at Sadar 2·40, Jangipur 3·88, Kandi 2·05, Lalbagh 2·93. Weather cloudy and hot. Prospects of jute and *bhadoi* favourable. Mulberry and indigo doing well. Transplantation of *aman* going on. Cattle-disease reported from thana Naba-gram and from the Kandi subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	12 $\frac{1}{2}$
Jangipur	13
Kandi	13 $\frac{1}{2}$
Lalbagh	12 $\frac{1}{2}$
	$\left. \begin{array}{l} 13 \\ 13\frac{1}{2} \\ 12\frac{1}{2} \end{array} \right\}$ per rupee.

**Jessore.**—Rainfall at Sadar 0·54, Jhenida 3·28, Magura 6·22, Narail 2·30, Bangaon 0·66. Weather sultry and cloudy. Harvesting of *aus* and jute going on. Prospects of standing crops good. Insects have appeared and are damaging the paddy in some places in the Bangaon subdivision. Rivers rising. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	15
Jhenida	14
Magura	15
Narail	14
Bangaon	13 $\frac{1}{2}$
	$\left. \begin{array}{l} 15 \\ 14 \\ 13\frac{1}{2} \end{array} \right\}$ per rupee.

**Khulna.**—Rainfall at Sadar 1·22, Bagerhat 2·66, Satkhira 1·61. Weather sultry. Transplantation of *aman* continues. Rain urgently wanted. Fodder and water sufficient. Cattle-disease reported from Rampai, Kachua, and Asasuni. Common rice sells as follows:—

	Srs.
Sadar	13½
Bagerhat	14
Satkhira	12 } per rupee.

**Rajshahi.**—Rainfall at Sadar 4·64, Nator 4·12, Naogaon 2·19. Weather rainy. Prospects of crops good. No cattle-disease. Fodder and water plentiful. Common rice selling at 15 seers per rupee.

**Dinajpur.**—Average rainfall 3·51. Weather seasonable. Prospects of jute and *bhadoi* rice fair. No cattle-disease except cow-pox reported from Pirganj. Fodder and water plentiful. Rice selling at 13 or 14 seers a rupee.

**Jalpaiguri.**—Rainfall at Sadar 16·14, Alipore Duars 9·41. Weather seasonable. *Bhadoi* paddy and jute in good condition. Transplantation of *haimanti* paddy going on. Common rice sells at 14 seers per rupee. Fodder and water sufficient.

**Darjeeling.**—Rainfall at Darjeeling 7·41, Kurseong 13·75, Siliguri 11·60, Kalimpong 4·09. Weather seasonable. *Hills*—*Bhutta* and potatoes are being harvested in places; *chota marua*, *bhadoi* paddy, and *haimanti* paddy promising well. *Terai*—*Bhadoi*, jute and sugarcane progressing; *haimanti* paddy being transplanted. Coarse rice sells as follows:—

	Srs.
Hills	9
Terai	14 } per rupee.

*Bhutta* sells at Darjeeling 10 seers and Pedong 16 seers per rupee.

**Rangpur.**—Rainfall at Sadar 5·06, Nilphamari 5·32, Gaibanda 5·30, Kurigram 3·87. Weather cloudy and rainy. Transplantation of *aman* and harvesting of *aus* and jute going on. Fodder and water sufficient. Rice sells as follows:—

	Srs.
Sadar	13
Nilphamari	16
Kurigram	16 } per rupee.

**Bogra.**—Average rainfall 5·44. Cutting of *aus* and jute and transplantation of *aman* going on. Prospects good. Fodder and water sufficient. Common rice sells at 14 seers per rupee.

**Pabna.**—Rainfall at Sadar 1·78, Sirajganj 2·62. Weather cloudy and rainy. High floods reported from Sirajganj. Damage to *aus* probably; otherwise prospects good. Prices unchanged.

**Dacca.**—Rainfall at Sadar 4·68, Manikganj 7·60, Munshiganj 3·50, Narainganj 3·96. Weather seasonable. Prospects of crops good. No cattle-disease. Fodder available. Common rice 13 seers per rupee.

**Mymensingh.**—Rainfall at Sadar 9·47, Jamalpur 9·49, Kishoreganj 11·68, Netrokona 5·93, Tangail 5·50. Weather seasonable. Prospects of crops good. Transplanting of *aman* in progress. *Aus* and jute are being harvested. Fodder available. Water sufficient. Common rice sells as follows:—

	Srs.
Sadar	14
Kishoreganj	14
Jamalpur	13½
Netrokona	15½
Tangail	12½ } per rupee.

**Faridpur.**—Rainfall at Sadar 5·85, Goalundo 7·81, Madaripur 1·94. Weather seasonable. State and prospects of crops good. Harvesting of *aus* and jute has begun. Common rice sells at 14 seers per rupee.

**Backergunge.**—Rainfall at Sadar 1·93. Weather seasonable. Prospects of crops good. Common rice sells at 15 seers per rupee.

**Tippera.**—Rainfall at Comilla 3·96, Brahmanbaria 8·87, Chandpur 4·05. Weather seasonable. Harvesting of jute and *aus* paddy continues. Damage to *aus* paddy reported from Brahmanbaria owing to excessive rain. No cattle-disease. Fodder and water sufficient. Average price of common rice 13½ seers per rupee.

**Noakhali.**—Rainfall at Sadar 3·51, Feni 3·66. Crop prospects good. Transplantation of *aman* and harvesting of *aus* going on. Cattle-disease continues at Sandip. Fodder and water sufficient. Price of common rice (*aus*) 14 seers and (*aman*) 13 seers per rupee.

**Chittagong.**—Rainfall at Sadar 3·19, Cox's Bazar 4·89. Fields are under cultivation for *aman* paddy. Cattle-disease continues in some places. Water and fodder sufficient. Common rice 12 seers per rupee.

**Patna.**—Rainfall at Sadar 3·56, Bikram 2·90, Bihar 3·22, Barh 1·03, Dinapore 1·01. Transplantation of *marua* and sowing of paddy finished. More rain wanted for transplantation of paddy. Prospects of crops good. Fodder and water sufficient. Coarse rice in Patna sells at 13 seers per rupee.

**Gaya.**—Good rain in last week. *Bhadoi* doing well. Transplantation of paddy going on. Common rice selling at 13 seers per rupee.

**Shahabad.**—Rainfall at Sadar 1·64, Buxar 2·37, Bhabua 0·91, Sasaram 0·39, Dehri 1·77. Prospects of standing crops good. Fodder and water sufficient. Rice at Sadar 11 seers per rupee.

**Saran.**—Rainfall at Sadar 0·88, Siwan 1·77, Gopalganj 3·70. Weather cloudy. Transplanting of paddy in progress. *Bhadoi* crops promising. Fodder and water sufficient. Common rice 11 seers 10 chitaks and *makai* 11 seers 8 chitaks, against 13 seers 3 chitaks and 19 seers 9 chitaks, normal prices.

**Champanar.**—Rainfall at Motihari 2·61, Bettiah 2·99. Weeding of *bhadoi* and transplantation of *aghani* going on. Prospects very promising. Prices of common rice and maize at Sadar are 10 $\frac{1}{4}$  and 13 seers per rupee respectively.

**Muzaffarpur.**—Rainfall at Sadar 3·52, Hajipur 1·08, Sitamarhi 3·98. Prospects continue favourable. Transplanting of rice going on. Prices are—Common rice 11 seers, wheat 12 seers, barley 15 $\frac{1}{2}$  seers, *makai* 12 $\frac{1}{2}$  seers, gram 14 $\frac{1}{2}$  seers, *arhar* 15 seers, and *marua* 18 seers per rupee.

**Darbhanga.**—Rainfall at Sadar 3·08, Samastipur 1·45, Madhubani 2·88. Transplantation of paddy in progress. Fodder and water sufficient. Cattle-disease reported from thana Madhuapore. Common rice sells as follows:—

	Srs.			
Sadar	...	...	...	12 $\frac{9}{16}$
Samastipur	...	...	...	11 $\frac{1}{2}$
Madhubani	...	...	...	12 $\frac{1}{2}$

} per rupee.

**Monghyr.**—Rainfall at Sadar 0·63, Begusarai 3·10, Jamui 4·54. Weather sultry. Transplantation of *marua* and paddy going on. *Bhadoi* crops damaged at Begusarai subdivision by last week's excessive rain; elsewhere they are doing well. Sugarcane flourishing. Common rice sells as follows:—

	Srs.			
Sadar	...	...	...	10 $\frac{5}{16}$
Begusarai	...	...	...	10 $\frac{1}{2}$
Jamui	...	...	...	11

} per rupee.

**Bhagalpur.**—Rainfall at Sadar 0·61, Banka 3·32, Madhipura 4·63, Supaul 6·35. Weather hot. The last week's rain has injured *makai* in some parts of Banka and Sadar subdivisions. Faddy transplantation going on briskly. Other crops growing well. Prices stationary. Fodder and water ample.

**Purnea.**—Rainfall at Sadar 5·08, Kishanganj 9·04, Araria 4·42. Weather cloudy and rainy. Standing crops doing well. Transplantation of *aghani* rice going on briskly. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.			
Sadar	...	...	...	13
Kishanganj	...	...	...	14
Araria	...	...	...	14

} per rupee.

**Malda.**—Rainfall at Sadar 2·82, Shibganj 1·74, Gajole 4·87. Weather hot and rainy. Prospects of *bhadoi* good. Transplantation of winter rice in progress. Cutting of jute and indigo going on. Cattle-disease reported from thana Tulsihatta. Average price of rice stationary. Fodder and water sufficient.

**Sonthal Parganas.**—Average rainfall 2·88. Weather seasonable. Standing crops promising. Paddy transplantation in full swing. More rain wanted for third-class lands in Jamtara. Fodder sufficient. Cattle-disease reported from Pakour and Rajmahal. Average price of rice  $11\frac{1}{4}$  seers and of maize 9 seers 6 chitaks per rupee.

**Cuttack.**—Rainfall at Sadar 0·52, Jajpur 1·54, Kendrapara 0·33, Banki 0·33. Weather hot. Beali being weeded. Re-ploughing of sarad continues. Rain is reported to be badly wanted in all the subdivisions for the standing crops. A kind of insect is damaging the beali paddy. Condition of cattle generally good. Common rice sells as follows:—

Srs.

Cuttack	...	...	...	$11\frac{1}{8}$	per rupee.
Jajpur	...	...	...	$14\frac{7}{8}$	
Kendrapara	...	...	...	$17\frac{1}{8}$	
Banki	...	...	...	$11\frac{7}{8}$	

**Balasore.**—Rainfall at Sadar 2·00. Asu in ear. Transplantation, weeding and reploughing of sarad continue. Jute, sugarcane, and cotton are thriving well. Rice sells at  $15\frac{1}{2}$ ,  $12\frac{1}{2}$ , and 16 seers per rupee in interior, Balasore, and Bhadrak respectively. Fodder and water sufficient. Cattle-disease reported from Balasore Circle.

**Puri.**—Rainfall at Sadar 0·81, Khurda nil. Rain badly wanted. Weather hot, sometimes cloudy. Transplantation and puddling of sarad continue. Beali growing well. Condition of mandia, sugarcane, and other miscellaneous crops good. Fodder and water sufficient. Common rice sells as follows:—

Srs.

Sadar	...	...	...	$11\frac{1}{8}$	per rupee.
Khurda	...	...	...	$13\frac{1}{8}$	
Interior of district	...	...	...	$12\frac{1}{8}$	

**Angul.**—Rainfall at Angul 1·05 and at Bissipara 0·31. Weather hot and cloudy. More rain urgently wanted for agricultural operations, which are backward. Suan, maize and other crops doing well. Sporadic cases of cattle-disease reported. Fodder sufficient. Sufficient private labour not available. 381 men, 33 women, and 25 children employed on road and other public works in Angul on 28th instant, and 121 men, 121 women, and 27 children in the Khondmals on the 17th. Rice selling from 8 to  $10\frac{1}{2}$  seers per rupee in Angul and  $7\frac{1}{2}$  seers in the Khondmals. Distress felt amongst the poorer and labouring classes who refuse to work on roads. Gratuitous relief is being given to old, helpless, and diseased persons and to children.

**Hazaribagh.**—Rainfall at Sadar 0·86, Giridi 2·14. Weather seasonable. Transplantation of paddy commenced, but more rain required. Fodder and water sufficient. Common rice sells at Sadar  $11\frac{1}{2}$  seers and at Giridi 10 seers per rupee.

**Ranchi.**—Rainfall 0·36. Weather hot and cloudy. Transplantation of paddy continues. Prospects of crops favourable, but more rain is wanted. Average price common rice 9 seers per rupee. No cattle-disease reported. Fodder and water sufficient. Numbers on relief on Thursday, the 26th July 1900:—

	Men.	Women.	Children.	Total.
Relief-works	5,071	2,687	1,579	9,337
Test-works	673	461	204	1,338
Kitchens	341	771	5,342	6,454
Dry doles	108	191	41	340

**Palamau.**—Rainfall 2·77. Weather hot. Transplantation of winter paddy commenced. Bhadoi prospects good. No cattle-disease. Fodder and water sufficient. Prices at Sadar are—rice and wheat 10 seers 2 chitaks, barley 12 seers 15 chitaks, gram 10 seers 11 chitaks, and mahua 14 seers per rupee. Numbers on relief on Thursday, the 26th July 1900:—

	Men.	Women.	Children.	Total.
Relief-works	118	85	65	268
Test-works	369	361	76	806
Kitchens	112	390	511	1,013
Relieved by Charitable Fund	112	160	156	428

**Manbhum.**—Rainfall at Sadar 0·67, Gobindpur 2·69. Weather hot and sultry. Bhadoi crops flourishing. Transplantation of winter rice retarded in south-east of district for want of rain. Heavy rain fell at Purulia to-day (30th). Cattle-disease reported from Gourangdi and Raghunathpur. Fodder and water sufficient. Average price of common rice at Sadar and Gobindpur 11 seers per rupee. Supply sufficient.

**Singhbhum.**—Rainfall 1·24. Transplantation is being delayed by want of rain. Average price of rice is 11 seers 14 chitaks per rupee in the district; at Chaibassa it is 10 seers per rupee.

**General Summary.**—The rainfall during the week has been general, but for the most part light. The transplantation of winter rice is being delayed for want of rain in the Burdwan, Orissa, and Chota Nagpur Divisions and parts of the Presidency Division; elsewhere it is progressing satisfactorily. Early rice, jute, sugarcane, and the *bhadoi* crops in general are in good condition. Some small damage to the *bhadoi* crops is reported to have been done by excessive rain in Tippera, Monghyr, and Bhagalpur. Insects are reported to have appeared in Midnapore, Jessore, and Cuttack, and to be doing damage to the young rice plants. There is plenty of fodder in every district. Cases of cattle-disease continue to be reported from some districts. The price of rice has risen in 14 districts, has fallen in 13, and is stationary in the rest.

### RESOLUTION ON THE ANNUAL REPORT ON THE WORKING OF THE CALCUTTA SHIPPING OFFICE AND OF THE SHIPPING OFFICES AT OUTPORTS FOR THE YEAR 1899-1900.

No. 1500 Marine.

Government of Bengal.

MARINE DEPARTMENT.

Dated Calcutta, 7th August 1900.

### RESOLUTION.

#### READ—

Letter No. 574B., dated 14th July 1900, from the Secretary to the Board of Revenue, Lower Provinces, submitting the annual report on the working of the Calcutta Shipping Office and of the Shipping Offices at outports for the year 1899-1900.

THE number of seamen of all nationalities shipped and discharged through the Calcutta office was 30,154 and 26,972, against the figures of 27,024 and

24,672 during the previous year. Their classification is shown in the following table :—

	1899-1900.	1898-1899.			
		Shipped.	Discharged.	Shipped.	Discharged.
British	... ...	1,596	1,392	1,540	1,301
Europeans—Continental	... ...	457	395	473	450
Americans, West Indians and Africans	... ...	204	143	214	167
Australians	... ...	13	16	10	10
Asiatics other than Indians	... ...	685	675	320	406
Indians, Proper	... ...	26,436	23,490	23,946	21,882
Eurasians and Goanese	... ...	762	951	521	456
South Sea Islanders...	... ...	1	...	...	...
Total	... ...	30,154	26,972	27,024	24,672

2. The increase is again attributed to the more general employment of Indian seamen. The total number shipped exceeds the number discharged by 3,182, and this is ascribed to the fact of several native crews engaged at Calcutta to join their vessels in the United Kingdom and elsewhere not having as yet returned to India. The engine-room crews of the German steamers trading to Calcutta continue to be Indian seamen.

3. The number of British seamen shipped during the year shows an increase of 56, while compared with the number discharged the excess is 204. This excess, it is explained, was caused by arrivals from outports. Taking the other nationalities, the most noticeable difference is under Eurasians and Goanese. Of the Eurasians 187 were discharged, against 94 re-shipped, the men who did not re-ship, 93 in number, having doubtless taken employment on shore. Among the Goanese, the number discharged exceeded that shipped, by 96, the excess returning, it is believed, to their homes.

4. The number of seamen of all nationalities shipped in and discharged from foreign vessels through their Consulates, and not included in the figures given above, are :—

Shipped	...	...	...	...	...	28
Discharged	...	...	...	...	...	40

5. There were 61 deserters, against 48 during the previous year. This number fluctuates considerably and no very good reason can be assigned. It is believed that the number during the current year consisted of men with small balance of wages due to them, who, being dissatisfied with their ships, and failing to obtain their discharge, elected to desert rather than proceed in their vessels. The rates of seamen's wages remained uniform throughout the year.

6. The receipts of the Calcutta Shipping Office amounted to Rs. 55,829, as compared with Rs. 49,281 during the previous year, or an increase of Rs. 6,548. This increase is, however, to a certain extent nominal, as the accounts for the year take into consideration for the first time the additional fees paid by shipmasters for the convenience of shipping and discharging seamen on board before and after office hours. Hitherto these receipts did not pass through the public accounts, but were paid direct to the officer employed on the duty, but under the orders of the Government of India all such fees are credited to Government, and the payment to the officer employed on the work being included under "Expenditure." The receipts from this source amount to Rs. 3,200. Excluding this, the increase during the year is reduced to Rs. 3,318, towards which the shipping and discharging fees contributed Rs. 3,393. There were small increases and decreases under other heads.

7. The expenditure during the year amounted to Rs. 25,746, or an increase of Rs. 2,818 in the preceding year. This includes a sum of Rs. 2,960 paid to the Assistant Shipping Master as overtime fees for shipping and discharging seamen on board before and after office hours. Excluding this, the ordinary expenditure of the office shows a reduction of Rs. 142. There is a reduction of Rs. 1,045 under "Establishment," due to the retirement of the Deputy Shipping Master on 16th January last. As his place has been taken by

an officer of the Royal Indian Marine, with the title of Assistant Port Officer and Deputy Shipping Master, it does not appear that any part of his salary has been charged to the Shipping Office. This matter will be enquired into separately.

8. The following table shews the receipts of the funds held in trust by the Calcutta Shipping Office on account of both European and Native seamen for the last two years :—

	1899-1900.	1898-99.
	Rs.	Rs.
Ticket money	... ...	1,800 1,040
Deposit money of British seamen	... 24,535	26,559
Ditto Native ditto	... 16,340	17,325
Estates of deceased seamen	... 3,065	3,904

9. There was a small increase of Rs. 760, and this is attributed to an increase in the number of Indian seamen (chiefly curry cooks, stewards and sweepers) shipped on sailing ships, who had allotted part of their wages for the benefit of their families.

10. Under "Deposit money of British seamen" there was a decrease of Rs. 2,024. As steamers make short voyages, the seamen, when discharged or left abroad, have now smaller amounts due to them as wages than was the case with crews of old sailing vessels. Of the total sum received, Rs. 23,690 represents the voluntary deposits of 215 seamen, and the balance was deposited by masters of ships as the wages of seven seamen, who had either refused to sign their accounts or were too ill to receive their money.

11. The decrease of Rs. 985 under the head "Deposit money of native seamen" is the result of the wages of a smaller number of native seamen having been deposited in the Shipping Office. The amount deposited represents the wages of 155 seamen, against 223 seamen in the previous year.

12. Under "Estates of deceased native seamen" there is a decrease of Rs. 859 due to the effects of deceased seamen not having realised the same prices as formerly, owing to the plague scare reducing old clothing to a nominal value.

13. The value of seamen's money-orders fell off from Rs. 12,603 to Rs. 6,012, owing to the seamen now discharged or left behind at Calcutta generally having smaller sums due to them as wages.

14. The number of distressed seamen sent home during the year was 24, against 27 in the previous year. The causes of distress were sickness 19, injuries 3, and want of employment 2.

15. Prominent attention has been drawn to the relief afforded to seamen by the District Charitable Society and the Sailors' Home. The former, it is said, supported 31 seamen for a period aggregating 120 months at a total cost of Rs. 1,680, besides 12 aged seamen, who were unable to work, at a cost of Rs. 2,016 per annum. In the Sailors' Home, in addition to the distressed seamen, whose expenses were paid either by the Board of Trade or from Government Grants, there were 152 destitute seamen who were accommodated at a cost of Rs. 2,109. There were besides 1,154 seamen accommodated on payment, of whom 1,006 found employment. The Lieutenant-Governor notices with pleasure the usefulness of both these institutions, and it is chiefly on this account that he has given them large grants both from Provincial Funds and from the fees realised from vessels for permission to work cargoes on Sundays.

16. There does not appear to be any change in the condition of European seamen. The Society of the Shipmasters' Federation continues its work of inducing good men to join the Mercantile Navy, but the increase in the foreign element in the crews of British ships is noticeable. There appears to be some improvement in the condition of Indian seamen. The men are more careful of their continuous discharge certificates than heretofore, and the serang's power over the lascar is said to be visibly on the wane. The seamanlike qualities of the men have so improved that during the year masters of some sailing ships have taken lascars in place of European able-bodied seamen. No appreciable change is apparent in the condition of the Goanese Christians, who generally form the saloon crews of merchant steamers.

17. Two complaints by seamen were made during the year. In one case some of the lascars of the S.S. *Jupiter* complained that they had been discharged without their wages. The master on being called on for an explanation reported that the men had deserted: but this appears to have been a misapprehension. The master was accordingly directed to discharge the men and pay them their wages. In the other case the master of the S.S. *Florida* obtained sanction to discharge his European firemen, but was told that unless the men had sufficient wages due to them for their maintenance and cost of passage back to the United Kingdom, their discharge would not be given. The master apparently gave three of the men extra wages to make up the necessary sum, and then, after their discharge, took some money away from them. His conduct was improper and he was called upon to refund the money he had taken. No case of ill-treatment of seamen were brought to notice.

18. At the port of Chittagong the number of seamen shipped and discharged was 39 and 72, against 42 and 53 in the previous year. The number discharged shows a large increase, and no explanation of this is afforded beyond the statement that 11 were discharged on medical certificate, 23 by mutual consent, and 38 on termination of agreements. It is satisfactory to observe, however, that there were no cases of distressed seamen.

19. The receipt on account of Trust Funds amounted to Rs. 3,892 and consisted of deposits received on account of the balance of wages of 13 British and 36 Indian seamen discharged on account of mutual consent or on termination of agreement and of 6 British seamen discharged under medical certificate. The whole of this was disbursed.

20. None of the seamen discharged elected to remit any part of their wages to the United Kingdom.

21. The Shipping Master visited 52 ships in port to enquire into the health of crews and into accidents and casualties happening on board and for inspection of seamen's provisions, drinking water, medical stores and forecastle accommodation, and no complaints were received.

22. No seamen were either shipped or discharged at False Point. The Shipping Master paid five visits to vessels in port, and found that the provisions, water and medicines supplied to the crew, as well as the forecastle accommodation, were good and ample. No complaints were received.

23. At Balasore no seamen were shipped or discharged, and no irregularity was noticed in the course of enquiries as to health of crews and the provisions and water supplied to them.

24. No transactions under the Merchant Shipping Act are reported to have taken place at Puri.

By order of the Lieutenant-Governor of Bengal,

R. B. BUCKLEY,  
Secy. to the Govt. of Bengal.

## WEATHER AND CROP REPORT.

*For the week ending the 6th August, 1900.*

**Burdwan.**—Rainfall at Sadar 3·63, Kalna 4·10, Katwa 4·24, Raniganj 0·54. Weather cloudy and hot. Transplantation of *aman* going on. More rain wanted. Fodder and water sufficient. Common rice selling as follows:—

	Srs.
Sadar	13
Kalna	12½
Katwa	12¾
Raniganj	10½
	$\left\{ \begin{array}{l} \text{per rupee.} \\ \text{ } \end{array} \right.$

**Birbhum.**—Rainfall at Sadar 1·70, Rampur Hât 3·95. Weather cloudy and rainy. More rain wanted. Transplantation of paddy continues. Sugarcane doing well. Price of common rice at Sadar 11½ seers and Rampur Hât 11 seers per rupee. Fodder sufficient.

**Bankura.**—Rainfall at Bankura 0·86, Vishnupur 1·37. Weather generally cloudy. Rainfall very insufficient. Prospects of crops very unfavourable. Transplantation of *aman* almost at a standstill in most parts of the district. Sugarcane doing well. Fodder and water sufficient. Price of common rice at Bankura 10 seers and at Vishnupur 10½ seers per rupee.

**Midnapore.**—Rainfall at Sadar 1·49, Contai 1·21, Tamluk 3·09, Ghatal 2·66. Weather cloudy. Transplantation going on in some places. More rain wanted. Sugarcane doing well. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	12
Contai	14
Tamluk	10¾
Ghatal	12
	$\left\{ \begin{array}{l} \text{per rupee.} \\ \text{ } \end{array} \right.$

**Hooghly.**—Rainfall at Sadar 3·81, Serampore 5·30, Arambagh 1·13. Transplantation of paddy going on. State of *aus*, jute, and sugarcane good. Common rice sells at 11 seers 7 chitaks per rupee.

**Howrah.**—Rainfall at Sadar 4·33, Ulubaria 2·36. Weather cloudy and rainy. Transplantation of *aman* going on. More rain wanted. Prospects of sugarcane good. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

**24-Parganas.**—Rainfall at Sadar 5·64, Barasat 5·55, Basirhat 7·37, Diamond Harbour 2·79. Weather seasonable. Prospects hopeful. Transplantation of *aman* going on. Recent rainfall has done much good to the standing crops. Stray cases of cattle-disease reported from Diamond Harbour. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	13
Barasat	12
Basirhat	14
Diamond Harbour	11½
	$\left\{ \begin{array}{l} \text{per rupee.} \\ \text{ } \end{array} \right.$

**Nadia.**—Rainfall at Sadar 2·05, Kushtia 1·64, Meherpur 0·79, Chundanga 1·69, Rana-ghat 2·73. Weather hot and cloudy. Prospect of *aus* paddy fair. Other standing crops doing well, but more rain urgently needed. Fodder and water sufficient. Price of common rice stationary.

**Murshidabad.**—Rainfall at Sadar 2·38, Jangipur 1·93, Lalbagh 1·60, Kandi 3·48. Weather cloudy and hot. Prospects of *bhidoi*, jute and sugarcane favourable. Transplantation of *aman* going on. Cow-pox reported from thanas Khargram, Barwan, and Naba-gram. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	12½
Jangipur	13
Lalbagh	12½
Kandi	13½
	$\left\{ \begin{array}{l} \text{per rupee.} \\ \text{ } \end{array} \right.$

**Jessore**.—Rainfall at Sadar 2·37, Jhenida 1·63, Magura 1·99, Narail 4·53, Bangaon 4·39. Weather gloomy and rainy. Harvesting of *aus* paddy and jute going on. Insects disappeared from the Bangaon subdivision. Prospects of crops good. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	...      ...      ...      15
Jhenida	...      ...      ...      14
Magura	...      ...      ...      14½
Narail	...      ...      ...      14
Bangaon	...      ...      ...      13½

} per rupee.

**Khulna**.—Rainfall at Sadar 4·37, Bagerhat 5·48, Satkhira 3·67. Weather variable. Transplantation of *aman* continues. More rain wanted. Fodder and water sufficient. Cattle-disease reported from Rampai, Kachua, and Asasuni. Common rice sells as follows:—

	Srs.
Sadar	...      ...      ...      13½
Bagerhat	...      ...      ...      14
Satkhira	...      ...      ...      12

} per rupee.

**Rajshahi**.—Rainfall at Sadar 0·69, Nator 1·11, Naogaon 2·45. Standing crops doing well. Condition of cattle good. Fodder and water ample. Common rice selling at 14½ seers per rupee.

**Dinajpur**.—Average rainfall 2·00. Weather unsettled. More rain required. Steeping of jute and transplantation of *haimanti* commenced. No cattle-disease. Fodder and water plentiful. Rice selling at 13 to 15 seers per rupee.

**Malpaiguri**.—Rainfall at Sadar 3·01, Alipore Duars 1·23. Weather seasonable. *Bhadoi* paddy and jute in good condition. Transplantation of *haimanti* paddy continues. Common rice sells at 14 seers per rupee. Fodder and water sufficient.

**Darjeeling**.—Rainfall at Darjeeling 5·75, Kurseong 7·87, Siliguri 8·85, Kalimpong 6·15. Weather seasonable. Hills—*Bhutta*, *chota marua*, and potatoes are being harvested; *bhadoi* paddy doing well; *haimanti* paddy being transplanted. Terai—*Haimanti* paddy being transplanted; *bhadoi* and jute progressing. Coarse rice sells as follows:—

	Srs.
Hills	...      ...      ...      9
Terai	...      ...      ...      14

} per rupee.

*Bhutta* sells at Darjeeling 10 seers and at Garubuthan 20 seers per rupee.

**Rangpur**.—Rainfall at Sadar 1·39, Nilphamari 1·01, Gaibanda 1·41, Kurigram 0·46. Weather hot. Harvesting of *aus* and jute and transplantation of *aman* going on. Fodder and water sufficient. Rice sells as follows:—

	Srs.
Sadar	...      ...      ...      13
Nilphamari	...      ...      ...      14
Gaibanda	...      ...      ...      10
Kurigram	...      ...      ...      14

} per rupee.

**Bogra**.—Average rainfall 2·93. Cutting of *aus* and jute and transplanting of *aman* going on. Greater portion of thanas Sariakandi and Dhunat flooded. *Aus* crop is likely to suffer much. Great distress among cattle in the flooded tract. Prospects good in other parts of the district. Common rice sells at 13½ seers per rupee.

**Pabna**.—Rainfall at Sadar 1·60, Sirajganj 1·77. Weather cloudy and rainy. Rivers falling. Prospects good. Prices unchanged.

**Dacca**.—Rainfall at Sadar 1·42, Manikganj 1·33, Munshiganj 3·12, Narainganj 3·15. Weather seasonable. Prospects good. Fodder available. No cattle-disease. Common rice 13 seers per rupee.

**Mymensingh**.—Rainfall at Sadar 3·78, Jamalpur 1·86, Kishoreganj 9·20, Netrokona 3·02, Tangail 0·83. Weather seasonable. *Aus* in low lands damaged in places by heavy rain and flood. Transplantation of *aman* and harvesting of *aus* and jute in progress. Prospects on the whole good. Fodder available. Water sufficient. Condition of cattle good. Common rice sells as follows:—

	Srs.
Sadar	...      ...      ...      14
Jamalpur	...      ...      ...      12½
Kishoreganj	...      ...      ...      13
Tangail	...      ...      ...      11½
Netrokona	...      ...      ...      15½

} per rupee.

**Faridpur.**—Rainfall at Sadar 5·17, Goalundo 1·73, Madaripur 3·58. Weather very rainy. State and prospects of crops very good. Common rice sells at 14 seers per rupee.

**Backergunge.**—Rainfall at Sadar 5·76. Weather seasonable. Prospects of crops good. Common rice sells at 13 seers (*aman*) per rupee.

**Tippera.**—Rainfall at Comilla 1·52, Brahmanbaria 0·27, Chandpur 1·95. Weather seasonable. Prospects of standing crops good. Fodder and water sufficient. Average price of common rice 13 seers per rupee.

**Noakhali.**—Rainfall at Sadar 5·33, Feni 3·05. Crop prospects good. Transplantation of *aman* and harvesting of *aus* continue. No cattle-disease. Fodder and water sufficient. Price of rice stationary.

**Chittagong.**—Rainfall at Sadar 2·81, Cox's Bazar 2·77. Fields are being cultivated for *aman* paddy. Cattle-disease continues in some places. Water and fodder sufficient. Common rice 12 seers per rupee.

**Patna.**—Rainfall at Sadar 0·82, Hilsa 0·70, Dinapore 1·01, Bikram nil, Barh 0·18, Bihar 0·49. Prospect of *bhadoi* crops looks well. More rain is wanted for transplantation of paddy. Condition of cattle good. Fodder and water-supply plentiful. Common rice in Patna sells at 13 seers per rupee.

**Gaya.**—Rainfall at Sadar 1·43, Jahanabad 0·87, Aurangabad 1·02, Nawada 1·75. *Bhadoi* doing well. Transplantation of paddy continues, but rain is wanted. Common rice selling at 11½ seers per rupee.

**Shahabad.**—Rainfall at Sadar 0·65, Buxar 0·11, Bhabua 1·15, Sasaram 1·42, Dehri 1·23. Prospects of standing crops good. Rain wanted for paddy transplantation. Fodder and water sufficient. Rice at Sadar 11 seers per rupee.

**Saran.**—Rainfall at Sadar 0·03, Siwan 0·83, Gopalganj 0·78. East winds. Weather occasionally cloudy. Transplantation of paddy going on. Rain wanted. *Bhadoi* doing well. Fodder and water plentiful. Common rice 11 seers 13 chitaks and *makai* 13 seers 14 chitaks per rupee.

**Champaran.**—Rainfall at Motihari 1·97, Bettiah 0·98. Weeding of *bhadoi* and transplantation of *aghani* going on. Prospects good. Prices of common rice and maize at Sadar are 10 and 13 seers per rupee respectively.

**Muzaffarpur.**—Rainfall at Sadar 0·80, Hajipur 0·49, Sitamarhi 0·15. Prospects good. More rain wanted for transplanting rice. Prices are—Common rice 11 seers, wheat 12 seers, barley 15 seers, gram 14½ seers, *arhar* 15 seers, and *marua* 18 seers per rupee.

**Darbhanga.**—Rainfall at Sadar 3·25, Samastipur 1·09, Madhubani 2·50. Transplantation of paddy in progress. Fodder and water sufficient. Cattle-disease reported from Madhipura and Khajauli thanas.\* Common rice sells as follows:—

	Srs.		
Sadar	...	...	12½
Samastipur	...	...	12 } per rupee.
Madhubani	...	..	13

**Monghyr.**—Rainfall at Monghyr 1·78, Begusarai 1·45, Jamui 6·37. Weather seasonable. Transplantation of paddy and *marua* continues. Weeding of *makai*, *marua*, and *sama* going on in places. Standing crops doing well. Common rice sells as follows:—

	Srs.		
Monghyr	...	...	10½
Begusarai	...	...	11 } per rupee.
Jamui	...	...	11

**Bhagalpur.**—Rainfall at Sadar 1·81, Banka 1·13, Madhipura 2·87, Supaul 3·65. Weather hot. Standing crops growing exceedingly well, with the exception of the *makai* crop, which will not yield more than 4 annas in the Sadar subdivision. Paddy transplantation in full swing. Prices stationary. Fodder and water ample.

**Purnea.**—Rainfall at Sadar 3·54, Kishanganj 7·47, Araria 8·03. Weather seasonable. Prospects of standing crops good. Transplantation of *aghani* paddy going on. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.		
Sadar	...	...	13
Kishanganj	...	...	14 } per rupee.
Araria	...	...	15

**Malda.**—Rainfall at Sadar 2·08, Shibganj 3·08, Gajole 7·51. Weather hot with occasional showers of rain. Strong east wind was blowing during the week. Prospects of *bhadoi* paddy good; harvesting going on in some places. Transplantation of winter rice continues. Cattle-disease reported from thana Shibganj. Fodder and water sufficient. Price of rice 12 $\frac{1}{4}$  seers per rupee.

**Sonthal Parganas.**—Average rainfall 1·36. Weather seasonable. Standing crops good. Transplantation and ploughing going on. More rain wanted in Deoghur, Jamtara, and Rajmahal. Cattle-disease in Rajmahal. Fodder sufficient. Average price of rice 11 seers 10 chitaks and of maize 9 seers 10 chitaks per rupee.

**Cuttack.**—Rainfall at Sadar 5·73, Jajpur 3·03, Kendrapara 1·83, Banki 2·72. Weather seasonable. *Beali* in ear. Re-ploughing of *sarad* continues. Rain is wanted in all the sub-divisions for the standing crops. A kind of insect is damaging the *beali* paddy. Condition of cattle generally good. Rinderpest among cattle reported from places. Common rice sells as follows:—

	Srs.
Cuttack	...      ...      ...      12 $\frac{1}{16}$
Jajpur	...      ...      ...      14 $\frac{7}{16}$
Kendrapara	...      ...      ...      17 $\frac{1}{16}$
Banki	...      ...      ...      11 $\frac{7}{16}$
	$\left. \begin{array}{l} \\ \\ \end{array} \right\}$ per rupee.

**Balasore.**—Rainfall at Sadar 2·18. *Asu* in ear. Transplantation, weeding, and re-ploughing of *sarad* continue. Jute, sugarcane, and cotton thriving well. Rice sells at 15 $\frac{1}{2}$ , 12 $\frac{1}{2}$ , and 16 seers per rupee in interior, Balasore, and Bhadrak respectively. Fodder and water sufficient. Cattle-disease reported from Balasore Circle.

**Puri.**—Rainfall at Sadar 2·38, Khurda 3·21. Puddling and transplantation of *sarad* paddy continue. *Beali*, sugarcane, *mandia*, *arhar*, and other miscellaneous crops doing well. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	...      ...      ...      11 $\frac{1}{16}$
Khurda	...      ...      ...      12 $\frac{9}{16}$
Interior of district	...      ...      ...      12 $\frac{9}{16}$
	$\left. \begin{array}{l} \\ \\ \end{array} \right\}$ per rupee.

**Angul.**—Rainfall at Angul 3·47 and at Bissipara 1·47. Weather cloudy with showers at intervals. The rain has been very beneficial. The situation is more hopeful. Agricultural operations brisk. More rain wanted to finish *beosan* and transplantation of winter paddy. *Bhadoi* crops flourishing. Harvesting of millets and *til* commenced. Sporadic cases of cattle-disease in Angul. Fodder sufficient. Common rice selling from 7 $\frac{1}{2}$  to 10 $\frac{1}{2}$  seers per rupee. Labour available in the fields. 618 men, 116 women, and 36 children employed on the 3rd instant on public works in Angul. Figures from Khondmals not received.

**Hazaribagh.**—Rainfall at Sadar 2·68, Giridi 1·94. Weather seasonable. Transplantation of paddy going on, but more rain wanted. *Bhadoi* promises splendidly. Fodder and water sufficient. Common rice sells at Sadar 11 $\frac{1}{2}$  seers and Giridi 11 seers per rupee.

**Ranchi.**—Rainfall 2·52. Weather seasonable. Prospects of crops favourable. Harvesting of *gundli* in full swing. Prices stationary. No cattle-disease reported. Fodder and water sufficient. Numbers on relief on Thursday, the 2nd August 1900:—

	Men.	Women.	Children.	Total.
Relief-works	...      6,258	4,006	2,324	12,588
Test-works	...      203	104	48	355
Kitchens	...      322	598	5,486	6,406
Dry doles	...      74	206	53	333

Kitchens and dry doles figures from Khunti not received.

**Palamau.**—Rainfall 3·51. Weather seasonable. Paddy transplantation going on. More rain wanted in places. *Bhadoi* crops and sugarcane doing well. Fodder and water sufficient. Prices at Sadar are—rice 10 seers 2 chitaks, barley 12 seers 15 chitaks, gram and wheat 11 $\frac{1}{2}$  seers, and *mahua* 14 seers 10 chitaks per rupee. Numbers on relief on Thursday, the 2nd August 1900:—

	Men.	Women.	Children.	Total.
Relief-works	...      129	114	81	324
Test-works	...      465	405	156	1,026
Kitchens	...      127	344	509	980
Relieved by Charitable Fund	...      48	108	2.0	366

**Manbhumi.**—Rainfall at Sadar 1·33, Gobindpur 1·30. Weather hot and sultry. *Bhadoi* crops doing well. Transplantation of winter rice still retarded in south of district

for want of rain. Cattle-disease reported from thana Gourangdi. Fodder and water sufficient. Average price of common rice at Sadar and Gobindpur 11 seers per rupee. Supply sufficient.

**Singhbhum.**—Report not received.

**General Summary.**—There was general rain in every district during the week, but the amounts in most cases were small, and up to date the amount received in most districts is below the average. More rain is required for the transplantation of the winter rice seedlings in the Burdwan, Patna, and Chota Nagpur Divisions, and in Nadia, Khulna, Dinajpur, the Sonthal Purnas, Cuttack, and Angul. Bankura and South Manbhum are in urgent need of heavy rain. The *bhadoi* crops, jute and sugarcane are generally very promising. Owing to excessive rain in Mymensingh some damage to the early rice has been done, and in Bogra the early rice is likely to suffer from floods. Cattle are generally in good condition except in the flooded tract of Bogra. The price of rice has risen in 17 districts, and fallen in 6.

Numbers on relief on Thursday, the 2nd August, 1900, as compared with the figures for the 26th July—

The mean pressure of the seven days	... ... ...	Inches	29.526
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	... ... ...	Inches	29.573
The total number of hours of bright sunshine	... ... ...	Hours	24.9
The maximum possible number of hours of sunshine	... ... ...		91.8
The mean temperature of the seven days	... ... ...		83.5
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	... ... ...		82.9
The extreme variation of temperature	... ... ...		16.6
The maximum temperature	... ... ...		93.8
The highest velocity of the wind in one hour	... ... ...	Miles	15
The mean relative humidity	... ... ...	%	86
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	... ... ...		86
The total fall of rain from 29th July to 4th August 1900	... ... ...	Inches	4.44
The average fall of the corresponding period for 24 years, Surveyor-General's Office	... ... ...		3.70
The total fall from 1st January to 4th August 1900	... ... ...		30.20
The average fall of the corresponding period for 24 years, Surveyor-General's Office	... ... ...		36.76

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

~~a~~, dew; o, overcast; d, drizzling rain; p, passing temporary showers.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,

Alipore (Calcutta), the 6th August 1900.

F. M. BASU, Head Clerk,

For Meteorological Reporter to the Govt. of India

and Director-General of Indian Observatories.

### PRELIMINARY FORECAST OF THE SUGARCANE CROP IN BENGAL, 1900.

THE following is published for general information.

*The 11th August 1900.*

F. A. SLACKE,  
*Secy. to the Govt. of Bengal.*

### DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

#### *Preliminary Forecast of the Sugarcane crop in Bengal, 1900.*

*Explanatory.*—Previous to 1899 no separate forecasts or final reports on the sugarcane crop of this Province were published, a note on this crop being incorporated in the report on the *rabi* harvest. With Government order No. 144T.—R., dated the 22nd May 1899, instructions were received for the preparation and publication of separate forecasts and separate final reports regarding the crop. The following preliminary forecast of the area and outturn of the sugarcane crop in Bengal for the year 1900 is accordingly issued for general information.

As it has not yet been possible to obtain reliable estimates of the sugar produced in the different districts from other sources than cane, no statistics regarding the production of this sugar are furnished in this report. Such information as has been received from any district has been noted in the remarks column of the statement appended to this report.

*The character of the season.*—In January the rainfall was below the average in all Divisions except Bhagalpur, Patna, and Chota Nagpur, where the fall was above the normal, and in the case of the last two Divisions was somewhat excessive for the month. In February there were some scattered showers, and altogether the fall was below the normal for the month in most parts of the Province. In Nadia, Jessore, Khulna, and Dacca the fall was above the average. In March the rainfall was deficient in a much greater degree than in the previous month throughout the Province, excepting at Mymensingh and Balasore, where it considerably exceeded the normal. There were some good showers in April in the Burdwan, Orissa, and Chota Nagpur Divisions, and also in the district of Mymensingh, but in all other districts the fall was more or less below the average, and in some cases *nil*. In May again the rainfall was considerably in defect, but the fall was general, every district receiving some more or less good showers. There was rain in all parts of the Province in the first and third weeks of June, while during the other two weeks there were light showers in scattered districts. In the beginning of July the rainfall was general but slight all over the Province. Fair rain has fallen since in most districts. On the whole the season has been a comparatively dry one; and although the sugarcane crop has not yet suffered much anywhere for want of moisture, the outturn will greatly depend on the monsoon conditions during the next two months.

*Area sown.*—The District Officers of Tippera and Chittagong have revised their estimates of normal area since the date of the last final report, and in consequence the provincial total now stands at 894,200 acres as compared with 889,900 acres returned last year. The District Officers of Nadia, Chittagong, Manbhum, and Puri have submitted revised figures as regards the area under sugarcane last year in those districts. In consequence of this, the total area under sugarcane in the Province in 1899 is now reported to have been 872,600 acres instead of 860,200 acres, the figures entered in the final report of the crop last year. In the current year, the total area under this crop is reported to be 861,100 acres. There is thus a decrease of 11,500 acres. There is a decrease of some 14,700 acres in Palamau alone, but the cause of this considerable reduction is not explained by the Deputy Commissioner. It is probably due to the comparatively short rainfall of the past sowing season.

*Outturn.*—From the statement summarising the district returns which is appended to this forecast, it will be seen that an outturn above the average is expected in only five districts, while in 16 districts the outturn is estimated at the normal. In six districts the estimates vary between 90 and 100 per cent. of a normal crop, and in as many other districts they vary between 80 and 90, while in the remaining 12 districts they fall below 80 per cent. of the normal.

According to the district returns, the outturn of the sugarcane crop this year in Bengal should be estimated at 95 per cent. of a normal crop, against 84 per cent. estimated as the actual outturn in the final report of 1899.

In most of the more important sugarcane districts the outturn has been estimated at the normal or above the normal, and I anticipate that if the remaining monsoon season is not unfavourable, a normal outturn will be obtained in the Province as a whole.

G. C. DUTT,  
*Asst. Director of the Dept. of Land Records  
and Agriculture, Bengal.*

(COUNTERSIGNED.)

P. C. LYON,  
*Director of the Dept. of Land Records  
and Agriculture, Bengal.*

CALCUTTA,  
The 7th August 1900.

*Preliminary forecast of the Sugarcane Crop of 1900.*

DIVISION.	District.	Total area of district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under sugarcane crop, in acres.	Approximate area under sugarcane last year (1899), in acres.	Estimated area under sugarcane this year (1900), in acres.	Taking 100 to represent the normal outturn, how much represented, the outturn last year (1899)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1900)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
		1	2	3	4	5	6	7	8	9
Burdwan	Burdwan ...	1,726,080	1,283,800	27,400	27,400	27,400	73	100	In Bolpur and Suri sugar is produced from the date-palm and the outturn is estimated at 36,000 and 200 lbs., respectively.  The crop is at present promising.	The estimate of the outturn at 75 per cent. would appear to be too low.
	Birbhum ...	1,121,820	900,000	9,000	7,000	8,000	61	75		
	Bankura ...	1,677,440	642,800	15,000	17,500	15,500	88	100	No sugar is manufactured from the date-palm, but about 2,000 maunds of <i>gur</i> are produced in the Vishnupur subdivision. The quantity of <i>gur</i> produced in the Sadar subdivision, if any, is insignificant.	
	Midnapore ...	3,319,040	2,113,900	20,400	18,700	16,300	92	84	The contraction of the sugarcane area this year at the Sadar is due to want of rain at the time of planting and to high wages prevailing in some localities. In the Contai subdivision, this crop is being gradually given up in favour of date-palms, &c.	
Presidency— <i>contd.</i>	Hooghly ...	1,087,360	703,300	14,500	12,500	13,700	79	81	For seasonable rains the outturn is expected to be good.	The outturn of 81 per cent. would appear to be too low an estimate.
	24-Parganas ...	3,574,851	1,102,000	4,500	4,000	4,500	107	107	Owing to the favourable rainfall, the outturn is expected to be above the average. <i>Gur</i> is manufactured from palm juice in the Diamond Harbour subdivision. The average yield of <i>gur</i> per tree is estimated to be 30 seers or 60 lbs. a year.	

Division.	District.	Remarks by District Officers.									Remarks by the Department of Land Records and Agri. culture, Bengal.
		1	2	3	4	5	6	7	8	9	
Murshidabad	Nadia	** 1,788,160	1,303,090	14,000	16,000	80	80	85	The decrease in the acrea sown this year is due to the unfavourable state of the weather during the sowing season, but there has been reasonable rain subsequently and a better outturn is expected. The amount of sugar produced from other sources (date-palm) is roughly estimated at 2,712,000 lbs.	77	
Jessore	Khulna	... 1,872,000	1,142,160	15,000	16,500	100	100	100	The decrease in the estimated outturn is due to deficiency of rain. No sugar is produced in this district either from the date-palm or from any other source.	65	
Presidency— Dacca		1,373,440	955,500	17,000	17,000					95	The outturn this year is expected to be better than that of the preceding year owing to favourable weather at the planting time. The rough estimate of sugar produced from date-palms may be taken as below :—
											Mds.
											Sugar ... 19,500
											Gur ... 165,800
											There are no other sources from which sugar is produced in this district.

<b>Rajshahi</b>	Rajshahi	...	1,863,040	1,222,100	18,000	14,500	15,500	100	96	Sugar is not produced from date-palms and other sources in the Sadar and Naogon subdivisions. In the Nator subdivision about 900 maunds of sugar are said to be produced from date-palms.
	Dinajpur	...	2,526,880	1,491,300	24,000	30,000	30,000	100	112	The late heavy rains are reported to have done much good to the sugarcane, and it is expected that the outturn this year will be about 12 per cent. above the normal. No sugar is manufactured either from sugarcane or the date-palm or any other source.
	Jalpaiguri	...	1,894,600	1,075,000	3,100	3,200	2,900	80	60	The area sown this year as well as the outturn expected are small owing to want of rain in the sowing season. No sugar is produced in this district from any other sources than cane.
	Darjeeling	...	744,960	148,000	400	200	200	100	67	
	Rangpur	...	2,231,040	1,602,700	24,100	22,500	22,800	97	100	The increase in the area and outturn is due to favourable rainfall.
	Bogra	...	869,700	660,000	12,000	12,000	12,000	90	100	The weather appears to be favourable for the crop. Hence a better outturn is expected. No sugar is produced from the date-palm or from any other sources in this district.
<b>Dacca— contd.</b>	Pabna	...	1,176,900	882,500	66,000	52,500	60,000	60	60	The floods last year not having been high, some low-lying lands have been brought under sugarcane cultivation in addition to the high lands usually under this crop. This accounts for the increase in area over the last year's figure.
	Dacca	...	1,780,480	1,213,500	20,000	21,800	20,000	79	100	The season has been favourable for the crop so far. Very little sugar is produced from the date-palm. It is not manufactured from any other source.
	Mymensingh	...	4,052,480	2,405,700	35,000	33,600	33,600	70	90	An average outturn may be expected, except in Netrokona, where the crop is reported to have suffered from want of rain. Sugar is not produced from the date-palm in this district. The quantity of sugar produced from other sources is too small to be reported.
	Faridpur	...	1,450,840	1,007,500	42,000	43,000	42,000	100	100	The rainfall of the year has been favourable to the crop, so an average outturn is expected.

Division.	District.	Remarks by District Officers.						Remarks by the Department of Land Records and Agriculture, Bengal.		
1	2	3	4	5	6	7	8	9	10	11
Taklung	Buckergunge	9,335,360	1,468,000	20,000	20,000	100	100	The crop is thriving well. As previously remarked, the date palms are not grown here in regular orchards. Hence it is impossible to give any figure for the area covered by date-palms. It is also difficult to give any accurate estimate of the number of date-palms in the district. One date-palm tree produces 15 to 20 seers or 3½ lbs. of sugar in a year and one mandu of date-gur produces 25 or 30 seers, or about 5 lbs. of sugar.		
Taklung	Noakhali	1,654,860	1,371,300	15,000	12,000	90	97	The area has been revised by special enquiry so far as it relates to the Brahmanbaria subdivision. The state of the crop up to date is favourable. Sugar is not produced from the date-palm or any other sources.		
Tippera	Chittagong	...	1,062,860	818,860	500	600	70	The soil of this district is not suited to the cultivation of sugarcane, and the culture is therefore much below the average. Sugar is not manufactured in this district. Molasses are prepared to some extent from the date-juice.		
Pains	Chittagong	...	1,194,841	504,960	9,200	9,000	90			
	Pains	...	1,363,560	930,460	3,000	5,300	92	Sugar is prepared from sugarcane only. The season has been favourable for sugarcane. In Bihar subdivision, however, some of the plants have been eaten up by white-ants.		

	Gaya	... 3,015,650	2,307,500	25,000	29,000	29,000	100	100	Sugar is not produced from any other source except from sugarcane in this district.
	Shahabad	... 2,795,500	1,841,500	36,000	36,000	36,000	48	100	The prospects are so far good.
	Saran	... 1,886,087	1,311,100	40,000	42,000	47,000	100	108	The increase in area is due, in the first place, to the rise in the price of raw sugar or <i>gur</i> and, secondly, to the fact that in many places, the <i>rabi</i> was almost entirely ruined by hail in January last, and therefore the cultivation of sugarcane was extended over <i>rabi</i> crop areas.
Patna	Champaran	... 2,259,340	1,364,000	13,000	17,600	15,000	75	100	The normal area is reported to have been sown with sugarcane. In this district sugar is not produced from the date-palm or any other sources than the sugarcane.
	Muzaffarpur	... 1,941,254	1,555,300	8,500	8,500	8,500	95	75	Low outturn due to want of rain in the hot weather. No sugar from any sources other than sugarcane is produced in this district.
	Darbhanga	... 2,134,400	1,580,700	75,900	73,200	73,700	81	100	The approximate average yield of <i>gur</i> per acre is 2,105 lbs.
	Monghyr	... 2,508,440	1,582,900	6,500	6,700	6,400	75	100	Sugar is not produced from any other sources in this district.
	Bhagalpur	... 2,764,640	2,097,000	54,700	54,700	54,700	95	116	The weather has been favourable up to date. No sugar is produced in this district from sources other than cane.
	Purnea	... 3,195,520	1,811,500	9,500	9,500	8,900	81	77	The decrease in the area sown is due to the prevalence of cholera amongst the cultivators, and want of rain in April. Drought is the cause of decrease in outturn. No sugar is produced from date palm, etc., in this district.
Bhagalpur	Malda	... 1,216,000	811,500	5,000	4,200	3,000	87	75	The decrease in area and outturn is due to want of sufficient rainfall at the time of planting sugarcane. Besides this, the soil of this district is not suitable for sugarcane. Sugar is not produced either from date-palm or from any other sources, but about 2,800 lbs. of <i>gur</i> per acre are produced from sugarcane in this district.
	Sonthal, Par-	3,500,100	1,827,300	16,700	16,700	16,700	105	107	The outturn is expected to be a little better than that of the last year owing to timely rainfall. Sugar is not produced from the date-palm and from other sources in this district.

**RESOLUTION ON THE ANNUAL REPORT ON THE GOVERNMENT  
CINCHONA PLANTATION AND FACTORY FOR THE YEAR  
1899-1900.**

**FINANCIAL DEPARTMENT.—MISCELLANEOUS.**

*Calcutta, the 12th August 1900.*

RESOLUTION—No. 4198 Mis.

**READ—**

The Report on the Government Cinchona Plantation and Factory in Bengal for the year 1899-1900.

**Read also—**

The Report for 1898-99 and the Resolution of Government recorded thereon.

The year under review was remarkable for the rainfall which is said to have been the heaviest on record since the plantation was started thirty-six years ago. It did considerable damage to the plantation, the loss being estimated at nearly Rs. 6,000, exclusive of the damage done to the roads leading from the plantation to Darjeeling and other places. The continuous wet weather was also unfavourable to the growth of cinchona. The number of trees up-rooted at the plantation for their bark was 195,860 against 469,440 in the previous year, while 223,981 young trees were planted out. The result of the year's operations was that the total number of living cinchona plants at the Government plantations (excluding the nursery stock which amounted to 146,080) at the close of the year was 2,207,366. A portion of the Dumsong Forest block has been converted into a cinchona reserve and a suitable spot has been selected to commence operations. This extension will be distinguished by the title of the Munsong Division of the plantation.

2. The crop of the year amounted to 208,652 lbs. of dry bark, all of which was obtained from the trees up-rooted at the Government plantations. The bulk of the bark was of the quinine-producing sort; and, with the exception of 806lbs. supplied to medical depots and sold to Government officers and to the public, was as usual made over to the cinchona factory for manufacture into quinine and febrifuge. In addition to this quantity, 153,739lbs. of bark were purchased at a total cost of Rs. 50,000.

3. The outturn of the factory was 8,799lbs. of sulphate of quinine and 4,046lbs. of cinchona febrifuge against 10,335lbs. and 3,921lbs., respectively, in 1898-99. The following statement compares the issues of the year with those of the preceding year:—

	1898-99.		1899-1900.	
	Sulphate of quinine. lbs. oz.	Cinchona febrifugo. lbs. oz.	Sulphate of quinine. lbs. oz.	Cinchona febrifuge. lbs. oz.
To Medical Depôt, Calcutta	1,535 0	400 0	2,065 0	200 0
Ditto Mian Mir	2,165 0	.....	1,000 0	.....
To Inspector-General of Civil Hospitals, Bengal (for District Medical Officers; Bengal.	.....	60 0	.....	30 0
To Inspector-General of Jails, Bengal—				
For jails and lock-ups in Bengal	5 0	1 0	.....	.....
For making into pice-packets at Alipore Jail.	2,200 0	.....	2,500 0	....
For compensation for loss of weight in conversion into pice-packets.	22 0	.....	25 0	.....
To Inspector-General of Civil Hospitals, N.-W.P. and Oudh—				
For making into pice-packets at Aligarh Jail.	50 0	.....	.....	.....
For compensation for loss of weight in conversion into pice-packets.	0 8	.....	.....	.....
Sold to Government officers, dispensaries, and medical missions, &c.	2,785 14½	.....	2,130 7½	.....
Sold to Government officers and to the general public.	.....	2,528 8	.....	2,524 4
Given as samples	... ...	3 2½ 4 4	5 5½ 2 8	
Total	8,766 8½	2,993 12	7,725 13	2,756 12

The foregoing figures show a diminished demand for quinine on the part of the Medical Depôt at Mian Mir, and from Government Officers and dispensaries, the latter being explained by the absence of demands from Bombay, the North-Western Provinces, Central Provinces, Burma, and some Native States which now obtain their supplies from the Madras Factory. On the other hand there was a larger demand from the Calcutta Medical Depôt and from the Jail Department for the manufacture of pice-packets. The stock of sulphate of quinine in hand at the close of the year was greater by 1,074lbs. than at the close of the year 1898-99.

4. The following statement compares the receipts from the sale of sulphate of quinine, cinchona febrifuge, cinchona bark, and other products of the plantation during the last two years:—

	1898-99. Rs.	1899-1900. Rs.
<b>By—</b>		
Sale for cash	... ...	73,327 63,031
Credit from the medical depôts	... ...	52,871 54,883

Credit from the Inspector-General of Jails, Bengal—		
For jails	... ...	95 ... ..
For pice-packets	... ...	31,900 36,250
Credit from the Inspector-General of Civil Hospitals, North-Western Provinces and Oudh.	725	.....
Total	<u>... 1,59,518</u>	<u>1,54,464</u>

5. The expenditure on the plantation amounted to Rs. 62,804 against Rs. 58,472 in the previous year, the increase being chiefly due to the sum of Rs. 3,046 spent on the new division at Munsong. The amount spent on account of the factory rose from Rs. 65,467 to Rs. 92,361, the increase being chiefly due to larger purchases of bark.

6. The surplus on the year's working, after providing for the expenditure of Rs. 3,046 on the newly opened extension of the plantation at Munsong, and in spite of the considerably decreased issues of sulphate of quinine during the year, amounted to Rs. 4,106.

7. The Lieutenant-Governor again desires to thank Major Prain, and also Mr. R. Pantling, the Deputy Superintendent of the Cinchona Plantations, for their careful management of the plantation and factory during the year.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,  
*Secretary to the Govt. of Bengal.*

**WORKING OF THE BENGAL JUTE WAREHOUSE AND FIRE-BRIGADE ACT IN THE COSSIPORE-CHITPUR, MANIKTALA, AND GARDEN REACH MUNICIPALITIES.**

**NOTIFICATION—No. 2816M.**

*The 14th August 1900.*—The following report is published for general information in accordance with the provisions of section 41 of the Licensed Warehouse and Fire-brigade Act of 1893.

E. N. BAKER,  
*Secy. to the Govt. of Bengal.*

No. 125M., dated Calcutta, the 11th July 1900.

From—W. C. MACPHERSON, Esq., I.C.S., Offg. Commissioner of the Presidency Division,

To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit herewith copies of the Reports on the working of the Bengal Jute Warehouse and Fire Brigade Act, I of 1893, for the year ending 31st March 1900 in the Cossipore-Chitpur, Maniktala and Garden Reach Municipalities, received from the Chairmen of those municipalities.

No. 717, dated Talla, the 29th June 1900.

From—BABU KRIPA NATH DUTTA, Chairman of the Cossipore-Chitpur Municipality,  
To—The Magistrate of the 24-Parganas.

SIR,

With reference to your circular memorandum No. 79M., received on the 27th June 1900, I have the honour to submit the following Report under section 41 of Act I (B.C.) of 1893, of the Jute Warehouses, &c., in the Cossipore-Chitpur Municipality for the year ending 31st March 1900, for submission to the Local Government.

2. During the year of report licenses were granted to 91 jute presses and warehouses including roperies, firewood and straw depôts, as detailed below, and the amount of license fees realised was Rs. 11,916-11-6:—

		Rs. A. P.
Jute press-houses	...	8,820 0 0
Jute warehouses	...	2,961 1 0
Roperies	...	95 6 0
Firewood depôts	...	16 14 3
Straw "	...	3 4 9
Golpatta "	...	5 1 6
Mutation-fee	...	15 0 0
Total	...	<u>11,916 11 6</u>

3. The following statement shows the receipts and disbursements of the jute license fees during the year under report:—

Receipts.	Amount.	Disbursements.	Amount.
1	2	3	4
Opening balance on the 1st April 1899.	Rs. A. P. 9,092 5 5	Paid to the Commissioner of Police for the maintenance of Fire Brigade for the year 1899-1900.	Rs. A. P. 12,941 0 0
License-fees, &c., realised for the year 1899-1900 under Act I of 1893.	11,916 11 6	Balance at the hands of the Commissioners on the 31st March 1900.	8,068 0 11
Total ...	21,009 0 11	Total ...	21,009 0 11

4. During the year of report fire broke out in the following places and properties were destroyed to the approximate value of Rs. 1,00,261 as detailed below:—

Locality. 1	Name of owner of properties destroyed. 2	Particulars of properties destroyed. 3	Approximate value of properties destroyed. 4
<i>Section A Suburbs.</i>			
Moti-jhil ...	Ram Baran Dosad ...	A portion of a golpatta hut.	Rs. 5

No. 166, dated Nareldanga, the 28th June 1900.

From—BABU APURVA CHUNDER BISWAS, Vice-Chairman of the Maniktala Municipality,

To—The Magistrate of the 24-Parganas.

With reference to your circular memorandum No. 79M., dated the 26th June 1900, forwarding copy of Divisional Commissioner's letter No. 131M. of the 23rd instant, calling for a Report on the working of the Bengal Jute Warehouse and Fire Brigade Act for the year 1899-1900, I have the honour to submit as follows :—

1. The Fire Brigade Budget for the year under report was prepared by the Commissioner of Police under section 26 (1) of Act I (B.C.) of 1893, and was accepted by the Commissioners of this Municipality at their general meeting held on the 26th August 1899, so far as it related to this municipality.

2. The proportionate share of contribution at one per cent. of the estimated amount of Rs. 69,953 towards the maintenance of the Fire Brigade establishment, viz., Rs. 693, was paid in two instalments. The total amount realised as fees from the warehouses under the Act was Rs 1,228-4-6 against Rs. 1,266-6-6 of the preceding year. The decrease was owing to a few shops and depots of *durmah* mats and firewood having ceased to exist at the beginning of the year under report.

3. During the year under review, 10 licenses were issued for the jute ware-houses and 62 for other descriptions of trades in inflammable materials, such as firewood, hay, straw, saw-mill, packing-cases, *durmah* mats, *golpatta*, &c., against 8 and 74 of the preceding year.

4. License-fees were levied at 6 per cent. per annum on the annual value of holdings as assessed for payment of municipal taxes on jute warehouses and at 10 per cent. on other descriptions of trade as mentioned above.

5. All the owners of warehouses paid their license-fees in due time, and therefore no prosecution was required to be instituted during the year.

6. The jute godowns and firewood depots are mostly situated near the Circular Canal, which forms the western boundary of this municipality. There is only one mill for the manufacture of gunny bags within this municipality, named the Surah Jute Mill Company, Limited, on the north side of the Nareldanga Main Road, and there are also four roperies.

7. No fire broke out during the year under report. But a fire broke out on the 7th of April 1900, at Meah Bazar, Beliaghata. There was no loss of life, though damage was done to the extent of about Rs. 500. No assistance of the Fire Brigade was received during the fire. The engine arrived on the spot too late to be of any service. The municipality requested the Commissioner of Police to keep a hand-pump at the Sealdah outpost, but the Commissioner in reply wrote that there being always a hand-pump at Palmer's Bridge, no other hand-pump was necessary.

## MANICKTALA MUNICIPALITY.

R. D. MEHTA,  
*Chairman.*

No. 86G.M., dated Garden Reach, the 28th June 1900.

From—W. GRAHAM, Esq., Chairman of the Garden Reach Municipality,  
To—The Magistrate of the 24-Parganas.

WITH reference to your circular memorandum No. 79M., of the 26th instant, I have the honour to report that a sum of Rs. 350 was paid to the Commissioner of Police during 1899-1900 as contribution to the Calcutta Fire Brigade Fund. This was the amount actually demanded by the Commissioner of Police as per his budget estimate of the Metropolitan Fire Brigade for the year ending 31st March 1900. The Commissioners could not levy a special rate to meet this small amount. A sum of Rs. 247 only was received under the head "Jute warehouse fees," and the balance, viz., Rs. 103, was paid out of the general fund.

2. There was no fire during the year under report. But in the previous year there was fire in the three bustees, viz., Kapiidanga, Buttigull and Circular Garden Reach, and the Calcutta Fire Brigade rendered material help, although they were not paid.

W. GRAHAM,

## WEATHER AND CROP REPORT.

*For the week ending the 13th August, 1900.*

**Burdwan.**—Rainfall at Sadar 1·66, Kalna 3·46, Katwa 3·00, Raniganj 2·35. Weather showery. Transplantation of *aman* going on. More rain wanted. Prospect of sugarcane good. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	Ch.
Sadar	...	12
Kalna	...	11
Katwa	...	13½
Raniganj	...	12 14
		10 8
		per rupee.

**Birbhum.**—Rainfall at Sadar 1·64, Rampur Hât 1·59. Weather hot and cloudy. More rain wanted. Paddy transplantation continues. Sugarcane progressing. Fodder sufficient. Price of rice at Sadar and Rampur Hât 12 seers per rupee.

**Bankura.**—Rainfall at Bankura 3·07, Vishnupur 1·49. Weather variable. The rainfall of the week has been very beneficial. More rain is required. Sugarcane doing well. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura 10 seers and at Vishnupur 10½ seers per rupee.

**Midnapore.**—Rainfall at Sadar 2·48, Contai 1·91, Tamluk 1·89, Ghatal 1·27. Weather cloudy and hot with occasional showers. Transplantation is going on in some places. More rain wanted. Sugarcane thriving well. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	12
Contai	14
Tamluk	10
Ghatal	12
	per rupee.

**Hooghly.**—Rainfall at Sadar 6·08, Serampore 10·25, Arambagh 1·66. Transplantation of *aman* rapidly going on. State of *aus* and sugarcane good. Common rice sells at 11½ seers per rupee.

**Howrah.**—Rainfall at Sadar 2·79, Ulubaria 1·55. Weather cloudy with occasional showers. Transplantation of *aman* going on. Recent rainfall has done much good to the standing crops. More rain wanted. Prospects of sugarcane and jute good. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

**24-Parganas.**—Rainfall at Sadar 1·71, Barasat 7·35, Basirhat 2·86, Diamond Harbour 1·99. Weather seasonable. Prospects hopeful. Transplantation of *aman* and harvesting of jute going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	13
Barasat	12
Basirhat	14
Diamond Harbour	11½
	per rupee.

**Nadia.**—Rainfall at Sadar 2·50, Kushtia 0·47, Meherpur 2·13, Chuadanga 2·64, Ranghat 2·75. Weather hot and cloudy. Prospects of standing crops good, but more rain is urgently needed. Fodder and water sufficient. Price of common rice stationary.

**Murshidabad.**—Rainfall at Sadar 1·27, Jangipur 1·25, Lalbagh 1·39, Kandi 1·50. Weather hot. Prospects of *bhadoi*, jute and sugarcane favourable. *Bhadoi* is being reaped and harvested in places. Transplantation of *aman* going on. Cattle-disease prevailing in thana Nabagram. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	12½
Lalbagh	12½
Jangipur	14
Kandi	13½
	per rupee.

**Jessore.**—Rainfall at Sadar 0·38, Jhenida 0·49, Magura 1·20, Narail 1·65, Bangaon 1·19. Weather gloomy; cloudy with occasional rain. Harvesting of *aus* paddy, jute and indigo going on. A kind of insect called *hathia* damaging paddy in the Magura subdivision. Rivers rising. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.
Sadar	... 15 }
Jhenida	... 14 }
Magura	... 14½ } per rupee.
Narail	... 14 }
Dangaon	... 13½ }

**Khulna.**—Rainfall at Sadar 1·35, Bagerhat 2·48, Satkhira 2·09. Weather variable. Transplantation of *aman* continues. More rain wanted. Fodder and water sufficient. Cattle-disease reported from Dumuria and Kachua. Common rice sells as follows:—

	Srs.
Sadar	... 14½ }
Bagerhat	... 14 }
Satkhira	... 12 }

**Rajshahi.**—Rainfall at Sadar 1·00, Nator 2·68, Naogaon 0·61. Prospects of crops fair. More rain wanted. Condition of cattle good. Fodder and water sufficient. Common rice selling at 15 seers per rupee.

**Dinajpur.**—Average rainfall 1·16. Weather bright with occasional showers. More rain required, especially in Thakurgaon, where cultivation of *aman* is being impeded. Jute steeping and *haimanti* transplantation in progress. No cattle-disease. Fodder and water plentiful. Rice sells at 15 seers per rupee.

**Jalpaiguri.**—Rainfall at Sadar 3·51, Alipore Duars 3·00. Weather hot. Transplantation of *haimanti* paddy going on. More rain wanted. Harvesting of *bhadoi* paddy commenced in places. Jute in good condition. Price of common rice steady. No want of fodder and water.

**Darjeeling.**—Rainfall at Darjeeling 4·47, Kurseong 4·57, Siliguri 2·55, Kalimpong 2·61. Weather seasonable. Hills—*Bhutta*, *chota marua*, and potatoes are being harvested; *bhadoi*, *haimanti* and *bara marua* promising well. Terai—*Haimanti* paddy being transplanted; jute and *bhadoi* doing well. Coarse rice sells as follows:—

	Srs.
Hills	... 9 }
Terai	... 15 }

per rupee.

*Bhutta* sells at 17 seers per rupee.

**Rangpur.**—Rainfall at Sadar 1·76, Kurigram 0·67, Gaibanda 1·60, Nilphamari 1·10. Weather hot. More rain wanted. Harvesting of *aus* and jute and transplantation of *aman* going on. Fodder and water sufficient. Rice sells as follows:—

	Srs.
Sadar	... 13 }
Gaibanda	... 10 }
Kurigram	... 14 }
Nilphamari	... 14 }

per rupee.

**Bogra.**—Average rainfall 1·18. Cutting of *aus* and jute and transplanting of *aman* going on. Flood in thanas Shariakandi and Dhunat subsiding. It damaged *aus* to a great extent and caused some injury to jute and *aman*. Prospects good elsewhere. Common rice sells at 13½ seers per rupee.

**Pabna.**—Rainfall at Sadar 1·6, Sirajganj 0·58. Weather cloudy and rainy. Prospects of crops good. Some damage to *aus* and jute from floods, which are going down. Prices unchanged.

**Dacca.**—Rainfall at Sadar 0·47, Manikganj 0·24, Munshiganj 0·92, Narainganj 1·27. Weather sultry. Prospects of crops good. No cattle-disease. Fodder available. Common rice 13 seers per rupee.

**Mymensingh**.—Rainfall at Sadar 2·89, Jamalpur 0·99, Kishoreganj 1·35, Netrokona 4·18, Tangail 1·39. Weather hot. Prospects of crops good. Transplantation of *aman* going on. Fodder available. Water sufficient. Condition of cattle good. Common rice sells as follows:—

	Srs.
Sadar	...      ...      ...      ... $13\frac{1}{2}$
Jamalpur	...      ...      ...      ... $12\frac{1}{4}$
Kishoreganj	...      ...      ...      ... $13$
Netrokona	...      ...      ...      ... $15\frac{1}{16}$
Tangail	...      ...      ...      ... $10\frac{1}{4}$

$\left. \begin{array}{l} \\ \\ \\ \\ \end{array} \right\}$  per rupee.

**Faridpur**.—Rainfall at Sadar 1·26, Madaripur 0·55, Goalundo 0·75. Weather seasonable. State and prospects of crops very good. Common rice sells at 14 seers per rupee.

**Backergunge**.—Rainfall at Sadar 2·81. Weather seasonable. Prospects of crops good. Common rice sells at 13 seers (*aman*) and 16 seers (*aus*) per rupee.

**Tippera**.—Rainfall at Sadar 1·26, Brahmanbaria 1·53, Chandpur 1·42. Weather seasonable. Harvesting of jute and *aus* paddy approaching completion. *Aman* crop doing well. Fodder and water sufficient. Average price of common rice 13 seers per rupee.

**Noakhali**.—Rainfall at Sadar 1·94, Feni 1·26. Crop prospects good. Transplantation of *aman* and harvesting of *aus* continue. No cattle-disease. Fodder and water sufficient. Common rice sells at 15 seers (*aus*) and 13 seers (*aman*) per rupee.

**Chittagong**.—Rainfall at Sadar 0·32, Cox's Bazar 6·09. Fields are being cultivated for *aman* paddy. Cattle-disease continues in Chakiria and Harbang. Water and fodder sufficient. Common rice 12 seers per rupee.

**Patna**.—Rainfall at Sadar 1·86, Bihar 2·06, Barh 1·80, Bikram 0·37, Dinapore 0·66, Hilsa nil. Transplantation of paddy going on in some places. More rain urgently wanted. *Bhadoi* crops doing well. Fodder and water for cattle sufficient. Coarse rice in Patna sells at 13 seers per rupee.

**Gaya**.—Rainfall at Sadar 0·75, Jahanabad 0·52, Aurangabad 0·75, Nawada 0·45. *Bhadoi* doing well. Transplantation of paddy going on, but rain urgently wanted. Coarse rice selling at  $11\frac{1}{2}$  seers per rupee.

**Shahabad**.—Rainfall at Sadar 1·26, Buxar 0·64, Bhabua 0·89, Sasaram 2·16, Dehri 0·93. Rain wanted for paddy; otherwise prospects good. Fodder and water sufficient. Rice at Sadar 11 seers per rupee.

**Saran**.—Rainfall at Sadar 1·32, Siwan 0·44, Gopalganj 0·74. Weather hot with east wind; generally cloudy. Rain urgently wanted for paddy transplantation. *Bhadoi* doing well. Fodder and water sufficient. Common rice 11 seers 14 chitaks and *makai* 13 seers 8 chitaks per rupee.

**Champaran**.—Rainfall at Motihari 6·2, Bettiah 1·14. Prospects of *aghani* and *bhadoi* are so far good, but more rain needed. Prices of common rice and maize at Sadar are  $10\frac{1}{2}$  and 13 seers per rupee respectively.

**Muzaffarpur**.—Rainfall at Sadar 0·33, Hajipur 2·01, Sitamarhi 1·37. Prospects good. Rain wanted for rice crop. Prices are—Common rice  $11\frac{1}{2}$  seers, wheat 12 seers, barley  $15\frac{1}{2}$  seers, maize  $14\frac{1}{2}$  seers, *arhar* 15 seers, and *marua* 18 seers per rupee.

**Darbhanga**.—Rainfall at Sadar 0·47, Samastipur 1·55, Madhubani 0·30. Transplantation of paddy is going on, but more rain wanted. *Bhadoi* crops doing well. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.
Sadar	...      ...      ...      ... $12\frac{9}{16}$
Samastipur	...      ...      ...      ... $12$
Madhubani	...      ...      ...      ... $13\frac{1}{2}$

$\left. \begin{array}{l} \\ \\ \end{array} \right\}$  per rupee.

**Monghyr**.—Rainfall at Monghyr 2·00, Begusarai 2·98, Jamui 2·20. Weather seasonable. Transplantation of paddy continues. Prospects of *bhadoi* hopeful. Standing crops doing well. Common rice sells as follows:—

	Srs.
Monghyr	...      ...      ...      ... $11\frac{1}{2}$
Begusarai	...      ...      ...      ... $11$
Jamui	...      ...      ...      ... $11$

$\left. \begin{array}{l} \\ \\ \end{array} \right\}$  per rupee.

**Bhagalpur.**—Rainfall at Sadar 1·13, Banka 5·11, Madhipura 1·53, Supaul 1·23. Weather hot. The standing crops present favourable prospects. Paddy transplantation continues. No cattle-disease. Fodder and water ample. Prices going down a little.

**Purnea.**—Rainfall at Sadar 0·83, Kishanganj 1·58, Araria 0·65. Weather hot. Prospects of standing crops good. Transplantation of paddy continues. Harvesting of *bhadoi* paddy commenced in places. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.		
Sadar	...	...	13
Kishanganj	...	...	14 } per rupee.
Araria	...	...	15

**Malda.**—Rainfall at Sadar 1·41, Gajole 0·28. Weather hot and cloudy. Harvesting of *bhadoi* paddy going on in some places. Prospects good. Cutting of jute going on. Transplantation of winter rice still continues. Cattle-disease reported from Gomastapur. Price of rice stationary. Fodder and water sufficient.

**Manbhum.**—Rainfall at Sadar 3·08, Gobindpur 2·85. Weather is of ordinary monsoon character. *Bhadoi* crops flourishing. Heavy rain fell during the week. Transplantation of winter rice progressing. Cattle-disease reported from thanas Gourangdi, Raghunathpur, Gobindpur and Topchanchi. Fodder and water sufficient. Average price of common rice at Sadar 10 seers 7 chitaks and at Gobindpur 11 seers per rupee. Supply sufficient.

**Singhbhum.**—Rainfall 3·61. Prospects favourable. Transplantation in progress. Average price of rice 11½ seers per rupee in the district and 10 seers at Chaibasa.

**General Summary.**—The rainfall during the week has been general, but, except in Orissa and parts of Chota Nagpur, it was for the most part light. More rain is still required for the transplantation of winter rice in the districts of the Burdwan and Patna Divisions, and in Nadia, Khulna, Rajshahi, Dinajpur, Jalpaiguri, Rangpur, Hazaribagh, and Palamu. Reports of the *bhadoi* crops, of jute, and of sugarcane are generally very favourable. Early rice and jute are being harvested. In Bogra and Pabna some damage to these crops has been caused by floods. Cattle-disease continues to be reported from several districts. Fodder is generally sufficient. The price of rice is reported to have fallen in 11 districts and risen in 9, and is stationary in the rest.
